1 Introduction

1.1 Overview

This document describes Binary Order Entry (BOE), the Cboe proprietary order entry protocol.

Where applicable, the terminology (e.g., time in force) used in this document is similar to that used by the FIX protocol to allow those familiar with FIX to more easily understand BOE. This document assumes the reader has basic knowledge of the FIX protocol.

BOE fulfills the following requirements:

- *CPU and memory efficiency.* Message encoding, decoding, and parsing are simpler to code and can be optimized to use less CPU and memory at runtime.
- *Application level simplicity.* State transitions are simple and unambiguous. They are easy to apply to a Member's representation of an order.
- *Session level simplicity.* The session level protocol (login, sequencing, replay of missed messages, logout) is simple to understand.

While Cboe has strived to preserve feature parity between FIX and BOE where possible, some features may only be available in one protocol or the other.

All binary values are in little Endian (used by Intel x86 processors), and not network byte order.

Each message is identified by a unique message type. Not all message types are used in all Cboe's trading environments globally. A listing of the supported message types is provided in 'Section 10 - List of Message Types'.

All communication is via standard TCP/IP.

Please refer to the [Cboe Options Exchange Integration Website](#) for additional details regarding upcoming changes in support of the migration of Cboe Options Exchange to the Bats technology platform.

1.2 Document Format

Blue highlighted sections highlight key differences between the Cboe US Options Exchanges (BZX Options Exchange "BZX", Cboe Options Exchange "C1", C2 Options Exchange "C2", and EDGX Options Exchange "EDGX").

1.3 Hours of Operation

All times noted are Eastern time zone (ET) based.

See the respective exchange websites for holiday schedules.

Cboe Options Exchanges support a Pre-Market Queuing Session that allows orders to be entered and queued prior to the start of the Global Trading Hours ("GTH") session and the Regular Trading Hours ("RTH") session.

For more information on the Cboe Opening Process, please refer to the Cboe Opening Process Specification.

Cboe Options Exchanges do not support a closing auction, but do support extended trading for options on select ETF and index products. All orders remaining after the Regular Trading Session that are not eligible for Extended Trading will be cancelled automatically. All orders remaining after the Extended session will be cancelled automatically. Members will receive `Order Cancelled` messages for all automatically cancelled orders.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

	C1	C2	BZX	EDGX
Order Acceptance	2:00 am - 3:00 am ET (SPX, VIX and FLEX)	7:30 am - 9:30 am ET (All Products)	7:30 am - 9:30 am ET (All Products)	7:30 am - 9:30 am ET (All Products)
	7:30 am - 9:30 am ET (All Products)			
GTH	3:00 am - 9:30 am ET (SPX, VIX and FLEX)	N/A	N/A	N/A
RTH	9:30 am - 4:00 am ET (All Products)	9:30 am - 4:00 pm ET (All Products)	9:30 am - 4:00 pm ET (All Products)	9:30 am - 4:00 pm ET (All Products)
	9:30 am - 4:15 pm ET (Select ETF's/ETN's and Index Products)	9:30 am - 4:15 pm ET	9:30 am - 4:15 pm ET	9:30 am - 4:15 pm ET

1.4 Data Types

The following data types are used by BOE. The size of some data types varies by message. All data types have default values of binary zero, in both Member to Cboe and Cboe to Member contexts.

- **Binary:** Little Endian byte order, unsigned binary value. The number of bytes used depends on the context.
 - One byte: `FE` = 254
 - Four bytes: `64 00 00 00` = 100
- **Signed Binary:** Little Endian byte order, signed two's complement, binary value. The number of bytes used depends on the context.
 - One byte: `DF` = -33
 - Four bytes: `64 00 00 00` = +100
- **Binary Price:** Little Endian byte order value, signed two's complement, eight bytes in size, with four implied decimal places. So, if the value is -123,400, the actual value taking into account implied decimal places is -12.34.
 - `08 E2 01 00 00 00 00 00` = 123,400/10,000 = 12.34
 - `F8 1D FE FF FF FF FF FF` = -123,400/10,000 = -12.34
- **Short Binary Price:** Little Endian byte order value, signed two's complement, four bytes in size, with four implied decimal places. So, if the value is 12,300, the actual value taking into account implied decimal places is 1.23.
 - `0C 30 00 00` = 12,300/10,000 = 1.23
- **Signed Binary Fee:** Little Endian byte order value, signed two's complement, eight bytes in size, with five implied decimal places. So, the value is -123,000 is -1.23 after taking account for the five implied decimal places.
 - `88 1F FE FF FF FF FF FF` = 123,000/100,000 = -1.23
- **Alpha:** Uppercase letters (A-Z) and lowercase letters (a-z) only. ASCII NUL (0x00) filled on the right, if necessary. The number of bytes used depends on the context.
- **Alphanumeric:** Uppercase letters (A-Z), lowercase letters (a-z) and numbers (0-9) only. ASCII NUL (0x00) filled on the right, if necessary.
- **Text:** Printable ASCII characters only. ASCII NUL (0x00) filled on the right, if necessary.
- **DateTime:** 8 bytes. The date and time, in UTC, represented as nanoseconds past the UNIX epoch (00:00:00 UTC on 1 January 1970). The nanoseconds portion is currently ignored and treated as 0 (i.e. the times are

only accurate to microseconds) on input, and will always be set to 0 by Cboe in outgoing messages. However, Cboe **may begin populating the nanoseconds portion at any time without warning.**

For example: 1,294,909,373,757,324,000 = 2011-01-13 09:02:53.757324 UTC.

- *Date*: Little Endian byte order, unsigned binary value, 4 bytes in size. The YYYYMMDD expressed as an integer.

1.5 Optional Fields and Bit fields

Some messages such as `New Order` and `Modify Order` have a number of optional fields. A count and number of bitfields in the message specify which optional fields will be present at the end of the message. If a bit is set, the field will be present. Fields are appended to the end of the message. There is no implicit framing between the optional fields. In order to decode the optional fields, they must be appended in a particular order to the end of the message. The fields of the first bitfield are appended first, lowest order bit first. Next, the fields of the next bitfield are appended, lowest order bit first. This continues for all bitfields. While certain reserved bits within a defined bitfield are used within another Cboe market and will be ignored, bits that are reserved for future expansion must be set to 0 when noted in the bitfield description.

The size, data type, and values for each field are described in ‘Section 7 – List of Optional Fields’.

Note that the set of optional fields returned for each Cboe to Member message type is determined at session login (using the `Login Request` message); hence, the exact size and layout of each message received by the client application can be known in advance. **Any requested optional field which is irrelevant in a particular context will still be present in the returned message, but with all bytes set to binary zero (0x00).**

Each return message from Cboe to Member indicates the optional fields which are present, even though the Member indicated during login which optional fields are to be sent. The reason for the inclusion (and duplication) is so that each message can be interpreted on its own, without having to find the corresponding login request or response to know which optional fields are present. So, for example, in a log file, decoding a message requires only that single message.

Example messages are shown with each message type which should help to make this concept clear.

1.6 Protocol Features

1.6.1 Complex Instruments and Signed Prices (C1, C2, and EDGX only)

All price fields in the BOE protocol are signed values capable of accommodating complex instruments that can be negative (See Data Types) for a description and an example of using the Binary Price type with a negative price). For an example of the use of the Binary Price type with negative price values in an application message, see the example BOE message in `New Complex Order`.

1.6.2 Done For Day Restatements

Good ‘Til Cancel (“GTC”) and Good ‘Til Day (“GTD”) orders can result in order persisting between sessions. The Cboe BOE protocol provides a mechanism for clients to request end-of-day restatement of GTC/GTD orders that will be persisted to the next trading session. See Section ‘Section 10 – Port Attributes’ for information on available port attributes, including Done For Day Restatements.

When enabled, Done For Day Restatement messages are sent to connected clients after the trading session ends, at 4:00 ET (4:15 for select ETF’s) and prior to the trading session disconnecting at 4:45 ET, for each order that will persist to the next trading session. Any time prior to the 4:45 ET cutoff, customers may send Order Cancel Request messages for any open GTC and GTD orders. All other order message types received after the market closes at 4:00 ET (4:15 ET for select ETF’s) will be rejected.

Done For Day Restatements are represented using `Order Acknowledgement` messages with the following optional attributes set;

- *BaseLiquidityIndicator* = A (Added Liquidity), bitfield 5, bit position 7
- *SubLiquidityIndicator* = D (Done For Day), bitfield 7, bit position 1

To receive Done For Day Restatements, the Done For Day Restatement port attribute must be set (contact Cboe Trade Desk), and customers must register to receive *BaseLiquidityIndicator* and *SubLiquidityIndicator* optional fields on Order Acknowledgement messages via the Logon Request message (See 'Section 3.1.1 – Login Request' for details on registering to receive optional fields on a per-message basis). If the Done For Day Restatement port attribute is set and the bitfield Logon Message registration for the Order Acknowledgement message does not include but *BaseLiquidityIndicator* and *SubLiquidityIndicator*, the logon attempt will fail.

1.6.3 Carried Order Restatements

Good 'Til Cancel ("GTC") and Good 'Til Day ("GTD") orders can result in orders persisting between sessions. The Cboe BOE protocol provides a mechanism for clients to request restatement of orders that have been carried forward from the previous business day trading session. See 'Section 11 – Port Attributes' for information on available port attributes, including 'Carried Order Restatements'.

When enabled, Carried Order Restatements are sent to connected clients for each product on the Options Exchange for which orders have been carried forward from the previous business day trading session. Carried Order Restatements are sent after connection establishment and before regular trading activity messages on a per-product basis.

Carried Order Restatements are represented using Order Acknowledgement messages with the following optional attributes set;

- *BaseLiquidityIndicator* = A (Added Liquidity), bitfield 5, bit position 7
- *SubLiquidityIndicator* = C (Carried), bitfield 7, bit position 1

To receive Carried Order Restatements, the Carried Order Restatement port attribute must be set (contact CFE Trade Desk), and customers must register to receive *BaseLiquidityIndicator* and *SubLiquidityIndicator* optional fields on Order Acknowledgement messages via the Logon Request message (See 'Section 3.1.1 – Login Request' for details on registering to receive optional fields on a per-message basis). If the Carried Order Restatement port attribute is set and the bitfield Logon Message registration for the Order Acknowledgement message does not include but *BaseLiquidityIndicator* and *SubLiquidityIndicator*, the logon attempt will fail.

1.6.4 Display Indicator Features

Display-Price Sliding (BZX Only)

If the original limit price of the unexecuted remainder of a day order does not lock or cross the NBBO then Cboe works the order at the original limit price while displayed at the nearest permissible quoting increment. If the original limit price does lock or cross the NBBO then Cboe makes available Display-Price Sliding.

Display-Price Sliding adjusts the original limit price on entry to the locking price of the NBBO. It will be ranked and worked at a price locking the NBBO but will temporarily adjust the displayed price to the nearest permissible quoting increment. When the NBBO widens, the display price will be readjusted to the adjusted limit price. The display price may be temporarily less aggressive than the adjusted limit price or working price.

Multiple Display-Price Sliding does not permanently adjust the original limit price on entry, but allows for Display-Price slid orders to continue to have their display and working prices adjusted towards their original limit price based on changes to the prevailing NBBO.

Contra-side Post Only orders that are received when a Display-Price Slid order is working at a locking price with the NBBO will not result in a reject of a contra-side Post Only order but will instead result in the working price of the Display-Price Slid order to be repriced to one penny away from the locking price.

Price Adjust (BZX, C1, C2, and EDGX)

If the limit price of an order does not lock or cross the NBBO, then the order will be ranked and displayed at the nearest permissible quoting increment.

If the limit price of a Price Adjust eligible order locks or crosses the NBBO, the limit price will be adjusted on entry to the locking price of the NBBO, while the displayed price and ranked price will be temporarily adjusted to the nearest permissible quoting increment. Price Adjust orders will never be ranked at the locking price or at a non-displayable price increment. If the NBBO widens, the displayed price and ranked price will be readjusted to the adjusted limit price.

The limit price of a Multiple Price Adjust order will not be permanently adjusted on entry if the limit price crosses the NBBO. The displayed price and ranked price will be the nearest permissible quoting increment and will be adjusted towards the original limit price based on changes in the prevailing NBBO.

NoRescrapeAtLimit (BZX Only)

Applicable only to fully routable IOC orders (9303=R and 59=3). After walking the price down to the limit, there will be no final scrape at Cboe and the cancel code will state "X: Expired" rather than "N: No Liquidity".

1.6.5 Risk Root

This document refers to the term "Risk Root" to describe Cboe Options Risk Management functionality that is applied at the symbol-level. The Risk Root is defined as the underlying symbol.

This impacts what value must be sent in the defined *RiskRoot* fields when performing a mass cancel or a reset of a risk trip.

See the [Risk Management Specification](#) for more details.

1.6.6 Cabinet and Sub-Cabinet Orders (C1 Only)

Cabinet orders are identified via *PriceType* = "0" and must have a valid *TimeInForce* of "Day", "GTC", "GTD" or "IOC". All non-IOC Cabinet orders are required to set *OpenClose* = "C". Cabinet orders will only trade with other cabinet orders on the book or floor depending on *FloorRoutingInst* and *FloorDestination* values.

1.6.6.1 Valid Pricing

Orders in non-penny classes must have a limit price **less than or equal to** \$0.01 and orders in penny classes must have a limit price **less than** \$0.01. Limit prices may be up to 4 decimal places.

1.6.6.2 Invalid Pricing

Orders in penny or non-penny classes priced **greater than** \$0.01 and orders in penny classes priced **equal to** \$0.01 will be rejected. Orders with a limit price that locks or crosses a resting non-cabinet order will be rejected.

1.6.6.3 Market Data

Cabinet orders or executions will not be disseminated on OPRA but will be available on http://cdn.cboe.com/resources/membership/BATS_US_EQUITIES_OPTIONS_MULTICAST_PITCH_SPECIFICATION.pdf and http://cdn.cboe.com/resources/membership/US_OPTIONS_MULTICAST_TOP_SPECIFICATION.pdf feeds.

1.6.7 At The Open And At The Close Orders

For more information on the following Auction Only Orders, please refer to the http://cdn.cboe.com/resources/membership/US_Options_Opening_Process.pdf.

Order Type	Order Entry Details	
Market-On-Open (MOO)	OrdType = 1 (Market)	TimeInForce = 2 (At the open)
Market-On-Close (MOC)		TimeInForce = 7 (At the close)
Limit-On-Open (LOO)	OrdType = 2 (Limit) Price = [price]	TimeInForce = 2 (At the open)
Limit-On-Close (LOC)		TimeInForce = 7 (At the close)
Late-Limit-On-Open (LLOO)		TimeInForce = 2 (At the open) ExecInst = r (Late)

1.6.8 Port Types

All BOE port types may be ordered through the Customer Web Portal using the **Logical Port Request** tool. Changes to port attributes may be requested through the same tool by submitting a 'Modify' request for one or more existing BOE ports.

1.6.8.1 BOE Order Ports

Standard BOE ports support simple and complex order entry but do not support the usage of the following message types: *Quote Update*, *Bulk Order*, *Purge Orders*. The attempted usage of any of these message types on standard BOE order ports will result in a rejection of the disallowed message.

Standard BOE ports are limited to 5,000 inbound messages per second. Once the inbound limit is reached new orders are rejected, modifies are handled as cancels, and cancels are processed normally.

1.6.8.2 BOE Bulk Quoting Ports

Support for quotes and end of support for bulk orders is based on the following rollout schedule.

Target Date	Milestone
11/09/18	Quotes available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Quotes available in EDGX Options Production Environment
01/25/19	Quotes available in BZX and C2 Options Production Environments
03/29/19	Bulk Order message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

BOE Bulk Quoting ports are intended for use by firms quoting large numbers of simple options series. As a result, they are unthrottled. However, firms may still experience poor performance on Bulk Quoting ports if excessive message traffic is sent.

The *PreventMatch* field may not be specified on the *Quote Update* message on Bulk Quoting Ports, but may be defaulted at the port level. For Bulk Quoting ports, only Cancel Newest, Cancel Oldest, or Cancel Both are permitted.

Bulk Quoting Port Order Acceptance Table

Message	Simple/Complex	Accepted over Bulk Quoting Port?	Other Conditions
Bulk Order	Simple	Yes	Must be marked Post Only on EDGX or C2 with TIF of Day or GTD with same day expiration.
Quote Update	Simple	Yes	Effective on launch of quotes per schedule above.
Quote Update (short)	Simple	Yes	Effective on launch of quotes per schedule above.
New Order	Simple	Yes	Must be marked Post Only on EDGX or C2 with TIF of Day or GTD with same day expiration.
New Order (Auction Response)	Simple	Yes	
New Order Cross (BAM/AIM or QCC)	Simple	No	
New Order Cross Multileg	Simple	No	
Purge Orders	Simple/Complex	No	
Reset Risk	Simple/Complex	Yes	Effective on launch of quotes per schedule above.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

New Complex Instrument	Complex	Yes (effective with release of Complex Post Only, date TBD)	
Bulk Order	Complex	No	
Quote Update	Complex	No	
New Complex Order	Complex	Yes (effective with release of Complex Post Only, date TBD)	Must be Post Only (<i>RoutingInst</i> = P)
New Complex Order (COA Response)	Complex	Yes	

Bulk Quoting Port Quote/Order Behavior Matrix

The following matrix describes the liquidity removal behavior of quotes and orders sent on Bulk Quoting ports effective **with the release of quotes per the schedule above**. Bulk Quoting ports will be available for use by all customers. Only registered Market Makers will be allowed to use quotes for liquidity removal. Orders sent on Bulk Quoting Ports will be allowed to remove liquidity only on BZX Options. On C1, C2, and EDGX Options, only registered Market Makers will be allowed to remove liquidity using *New Order* messages.

Once any quote or order is posted to the exchange book liquidity removal against any contra capacity will always be allowed in the case that a subsequent event causes the resting quote or order to be re-evaluated, such as the Opening/Re-Opening Process.

Originating Side (<i>Capacity</i>)	Contra Side (<i>Capacity</i>)			
	BZX	C2	EDGX	C1
Quote Update Seeking to Remove (M)	Allowed (ALL)	Allowed (All Except "M")	Allowed (All Except "M")	Allowed (All Except "M")
Quote Update Seeking to Remove (All Except "M")	Reject	Reject	Reject	Reject
New Order Seeking to Remove (M)	Allowed (ALL)	Allowed (All Except "M")	Allowed (All Except "M")	Allowed (All Except "M")
New Order Seeking to Remove (All Except "M")	Allowed (ALL)	Reject	Reject	Reject
Passive Quote Update or New Order (ALL)	Allowed (ALL)	Allowed (ALL)	Allowed (ALL)	Allowed (ALL)

1.6.8.3 BOE Purge Ports

BOE Purge Ports support a single message type: *Purge Orders*. Members may use this port type to request a cancellation of groups of orders, including orders across multiple BOE Order or Bulk/Quoting ports.

2 Session

2.1 Message Headers

Each message has a ten byte header. The two initial *StartOfMessage* bytes are present to aid in message reassembly for network capture purposes. The *MatchingUnit* field is only populated on sequenced, non-session level messages sent from Cboe to the Member. Messages from Member to Cboe and all session level messages must always set this value to 0.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	Message type.
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH. For session level traffic, the unit is set to 0. For messages from Member to Cboe, the unit must be 0.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Messages from Cboe to Member are sequenced distinctly per matching unit. Messages from Member to Cboe are sequenced across all matching units with a single sequence stream. Member can optionally send a 0 sequence number on all messages from Member to Cboe. Cboe highly recommends that Members send sequence numbers on all inbound messages.

2.2 Login, Replay and Sequencing

Session level messages, both inbound (Member to Cboe) and outbound (Cboe to Member) are unsequenced.

Inbound (Member to Cboe) application messages are sequenced. Upon reconnection, Cboe informs the Member of the last processed sequence number; the Member may choose to resend any messages with sequence numbers greater than this value. A gap forward in the Member's incoming sequence number is permitted at any time and is ignored by Cboe. Gaps backward in sequence number (including the same sequence number used twice) are never permitted and will always result in a *Logout* message being sent and the connection being dropped.

Most (but not all) outbound (Cboe to Member) application messages are monotonically sequenced per matching unit. Each message's documentation will indicate whether it is sequenced or unsequenced. While matching units on BOE correspond directly to matching units on Multicast PITCH, sequence numbers do not.

Upon reconnection, a Member sends the last received sequence number per matching unit in a *Login Request* message. Cboe will respond with any missed messages. However, when the *Login Request NoUnspecifiedUnitReplay* flag is enabled, Cboe will exclude messages from unspecified matching units during replay. Cboe will send a *Replay Complete* message when replay is finished. If there are no messages to replay, a *Replay Complete* message will be sent immediately after a *Login Response* message. Cboe will reject all orders during replay.

Assuming a Member has requested replay messages using a properly formatted `Login Request` after a disconnect, any unacknowledged orders remaining with the Member after the `Replay Complete` message is received should be assumed to be unknown to Cboe.

Unsequenced messages will not be included during replay.

A session is identified by the username and session sub-identifier (both supplied by Cboe). Only one concurrent connection per username and session sub-identifier is permitted.

If a login is rejected, an appropriate `Login Response` message will be sent and the connection will be terminated.

2.3 Sequence Reset

A reset sequence operation is not available for Binary Order Entry. However, a Member can send a `Login Request` message with `NoUnspecifiedUnitReplay` field enabled, and `NumberOfUnits` field set to zero. Then, upon receiving a `Login Response` message from Cboe, the Member can use the field `LastReceivedSequenceNumber` as the sequence starting point for sending future messages.

2.4 Heartbeats

`Client Heartbeat` messages are sent from Member to Cboe and `Server Heartbeat` messages are sent from Cboe to Member if no other data has been sent in that direction for one second. Like other session level messages, heartbeats from Cboe to the Member do not increment the sequence number. If Cboe receives no inbound data or heartbeats for five seconds, a `Logout` message will be sent and the connection will be terminated. **Members are encouraged to have a one second heartbeat interval and to perform similar connection staleness logic.**

2.5 Logging Out

To gracefully log out of a session, a `Logout Request` message should be sent by the Member. Cboe will finish sending any queued data for that port and will then respond with its own `Logout` message and close the connection. After receipt of a `Logout Request` message, Cboe will ignore all other inbound (Member to Cboe) messages except for `Client Heartbeat`.

3 Session Messages

3.1 Member to Cboe

3.1.1 Login Request

A `Login Request` message must be sent as the first message upon connection.

A number of repeating parameter groups, some of which may be required, are sent at the end of the message. Ordering of parameter groups is not important. New parameter groups may be added in the future with no notice.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x37
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	Always 0 for session level messages.
<i>SessionSubID</i>	10	4	Alphanumeric	Session Sub ID supplied by Cboe.
<i>Username</i>	14	4	Alphanumeric	Username supplied by Cboe.
<i>Password</i>	18	10	Alphanumeric	Password supplied by Cboe.
<i>NumberOfParam Groups</i>	28	1	Binary	A number, n (possibly 0), of parameter groups to follow.
<i>ParamGroup₁</i>				First parameter group.
...				
<i>ParamGroup_n</i>				Last parameter group.

Unit Sequences Parameter Group

This parameter group includes the last consumed sequence number per matching unit received by the Member. Cboe uses these sequence numbers to determine what outbound (Cboe to Member) traffic, if any, was missed by the Member. If this parameter group is not sent, it's assumed the Member has not received any messages (e.g., start of day).

The Member does not need to include a sequence number for a unit if they have never received messages from it. For example, if the Member has received responses from units 1, 3, and 4, the `Login Request` message need not include unit 2. If the Member wishes to send a value for unit 2 anyway, 0 would be the only allowed value.

Only one instance of this parameter group may be included.

Field	Offset	Length	Data Type	Description
<i>ParamGroupLength</i>	0	2	Binary	Number of bytes for the parameter group, including this field.
<i>ParamGroupType</i>	2	1	Binary	0x80
<i>NoUnspecified UnitReplay</i>	3	1	Binary	Flag indicating whether to replay missed outgoing (Cboe to Member) messages for unspecified units. 0x00 = False (Replay Unspecified Units) 0x01 = True (Suppress Unspecified Units Replay)

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>NumberOfUnits</i>	4	1	Binary	A number, n (possibly 0), of unit/sequence pairs to follow, one per unit from which the Member has received messages.
<i>UnitNumber₁</i>		1	Binary	A unit number.
<i>UnitSequence₁</i>		4	Binary	Last received sequence number for the unit.
...				
<i>UnitNumber_n</i>		1	Binary	A unit number.
<i>UnitSequence_n</i>		4	Binary	Last received sequence number for the unit.

Return Bitfields Parameter Group

This parameter group, which may be repeated, indicates which attributes of a message will be returned by Cboe for the remainder of the session. This allows Members to tailor the echoed results to the needs of their system without paying for bandwidth or processing they do not need.

Listing of the return bitfields which are permitted per message is contained in ‘Section 7 – Return Bitfields per Message’.

Field	Offset	Length	Data Type	Description
<i>ParamGroupLength</i>	0	2	Binary	Number of bytes for the parameter group, including this field.
<i>ParamGroupType</i>	2	1	Binary	0x81
<i>MessageType</i>	3	1	Binary	Return message type for which the bitfields are being specified (e.g., 0x25 for an <i>Order Acknowledgment</i> message).
<i>NumberOfReturn Bitfields</i>	4	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield₁</i>	5	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfield_n</i>		1	Binary	Last bit field.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Example Login Request Message:

Note this example is for illustrative purposes only. Actual login messages will contain specification of return bitfields for a larger set messages and each return bitfield specification will be complete whereas the example below is only an illustration for purposes of demonstrating the construction of the Login Request message.

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	3D 00	61 bytes
MessageType	37	Login Request
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	00 00 00 00	Always 0 for session level messages
SessionSubID	30 30 30 31	0001
Username	54 45 53 54	TEST
Password	54 45 53 54 49 4E 47 00 00 00	TESTING
NumberOfParam Groups	03	3 parameter groups
ParamGroupLength	0E 00	15 bytes for this parameter group
ParamGroupType	80	0x80 = Unit Sequences
NoUnspecified	01	True (replay only specified units)
UnitReplay		
NumberOfUnits	02	Two unit/sequence pairs to follow;
UnitNumber ₁	01	Unit 1
UnitSequence ₁	4A BB 01 00	Last received sequence of 113,482
UnitNumber ₂	02	Unit 2
UnitSequence ₂	00 00 00 00	Last received sequence of 0
ParamGroupLength	08 00	8 bytes for this parameter group
ParamGroupType	81	0x81 = Return Bitfields
MessageType	25	0x25 = Order Acknowledgment
NumberOfReturn Bitfields	03	3 bitfields to follow
ReturnBitfield ₁	00	No bitfields from byte 1
ReturnBitfield ₂	41	Symbol, Capacity
ReturnBitfield ₃	05	Account, ClearingAccount
ParamGroupLength	0B 00	11 bytes for this parameter group
ParamGroupType	81	0x81 = Return Bitfields
MessageType	2C	0x2C = Order Execution
NumberOfReturn Bitfields	06	6 bitfields to follow
ReturnBitfield ₁	00	No bitfields from byte 1
ReturnBitfield ₂	41	Symbol, Capacity
ReturnBitfield ₃	07	Account, ClearingFirm, ClearingAccount
ReturnBitfield ₄	00	No bitfields from byte 4
ReturnBitfield ₅	40	BaseLiquidityIndicator
ReturnBitfield ₆	00	No bitfields from byte 6

3.1.2 Logout Request

To end the session, the Member should send a `Logout Request` message. Cboe will finish sending any queued data and finally respond with a `Logout` message and close the connection.

A Member may simply close the connection without logging out, but may lose any queued messages by doing so.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x02
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	Always 0 for session level messages.

Example Logout Request Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	08 00	8 bytes
<i>MessageType</i>	02	<code>Logout Request</code>
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	00 00 00 00	Always 0 for session level messages

3.1.3 Client Heartbeat

See 'Section 2.4 – Heartbeats' for more information about heartbeats and the session level protocol.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x03
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	Always 0 for session level messages.

Example Client Heartbeat Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	08 00	8 bytes
<i>MessageType</i>	03	<code>Client Heartbeat</code>
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	00 00 00 00	Always 0 for session level messages

3.2 Cboe to Member

3.2.1 Login Response

A *Login Response* message is sent in response to a *Login Request* message. On a successful login, the *LoginResponseStatus* will be set to 'A'. On a failed login, *LoginResponseStatus* will be set to a value other than 'A', and *LoginResponseText* will be set to an appropriate failure description.

Cboe will verify Return Bitfields at login time. If the Return Bitfields in a Return Bitfields Parameter Group are invalid, *LoginResponseStatus* will be set to F, and *LoginResponseText* will include a description of which byte and bit are invalid. This is done to ensure that reserved fields are not used, and only options that apply to the local market are set. See 'Section 6 – Return Bitfields Per Message' for additional information.

Note that two sets of sequence numbers are available on the *Login Response*. The set of sequence numbers in the body are the actual Cboe to Member sequence numbers indicating the highest sequence numbers available per matching unit. If specified during login, the Unit Sequences Parameter Group will also be returned which is an echo of the sequence numbers the Member presented during login as the highest received. If these are different, it indicates a gap which will be filled by Cboe.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x24
<i>MatchingUnit</i>	5	1	Binary	Always 0 for session level messages.
<i>SequenceNumber</i>	6	4	Binary	Always 0 for session level messages.
<i>LoginResponseStatus</i>	10	1	Alphanumeric	Accepted, or the reason for the rejection. A = Login Accepted N = Not authorized (invalid username/password) D = Session is disabled B = Session in use S = Invalid session Q = Sequence ahead in Login message I = Invalid unit given in Login message F = Invalid return bit field in login message M = Invalid Login Request message structure
<i>LoginResponseText</i>	11	60	Text	Human-readable text with additional information about the reason for rejection. ASCII NUL (0x00) filled on the right, if necessary.
<i>NoUnspecifiedUnitReplay</i>	71	1	Binary	Echoed back from the original <i>Login Request</i> message.
<i>LastReceivedSequenceNumber</i>	72	4	Binary	Last inbound (Member to Cboe) message sequence number processed by Cboe.
<i>NumberOfUnits</i>	76	1	Binary	A number, n, of unit/sequence pairs to follow, one per unit. A pair for every unit will be sent, even if no messages have been sent to this port today. For unsuccessful logins, this will be 0.
<i>UnitNumber₁</i>		1	Binary	A unit number.
<i>UnitSequence₁</i>		4	Binary	Highest available Cboe to Member sequence number for the unit.
...				
<i>UnitNumber_n</i>		1	Binary	A unit number.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>UnitSequence_n</i>		4	Binary	Highest available Cboe to Member sequence number for the unit.
<i>NumberOfParam Groups</i>		1	Binary	Echoed back from the original Login Request message.
<i>ParamGroup₁</i>				Echoed back from the original Login Request message.
...				
<i>ParamGroup_n</i>				Echoed back from the original Login Request message.

Example Login Response Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	88 00	136 bytes
<i>MessageType</i>	24	Login Response
<i>MatchingUnit</i>	00	Always 0 for session messages
<i>SequenceNumber</i>	00 00 00 00	Always 0 for session level messages
<i>LoginResponseStatus</i>	41	A = Login Accepted
<i>LoginResponseText</i>	41 63 63 65 70 74 65 64 00	Accepted (padding) (padding) (padding) (padding) (padding)
<i>NoUnspecified UnitReplay</i>	01	True (replay only specified units)
<i>Last Received Sequence Number</i>	54 4A 02 00	Last sequence Cboe received of 150,100
<i>NumberOfUnits</i>	04	Four unit/sequence pairs to follow;
<i>UnitNumber 1</i>	01	Unit 1
<i>UnitSequence1</i>	4A BB 01 00	Actual last sequence of 113,482
<i>UnitNumber 2</i>	02	Unit 2
<i>UnitSequence2</i>	00 00 00 00	Actual last sequence of 0
<i>UnitNumber 3</i>	02	Unit 3
<i>UnitSequence3</i>	00 00 00 00	Actual last sequence of 0
<i>UnitNumber 4</i>	02	Unit 4
<i>UnitSequence4</i>	79 A1 00 00	Actual last sequence of 41,337
<i>NumberOfParam Groups</i>	03	3 parameter groups
<i>ParamGroupLength</i>	14 00	20 bytes for this parameter group
<i>ParamGroupType</i>	80	0x80 = Unit Sequences
<i>NoUnspecified UnitReplay</i>	01	True (replay unspecified units)
<i>NumberOfUnits</i>	03	Three unit/sequence pairs to follow;
<i>UnitNumber 1</i>	01	Unit 1
<i>UnitSequence1</i>	4A BB 01 00	Last received sequence of 113,482
<i>UnitNumber 2</i>	02	Unit 2
<i>UnitSequence2</i>	00 00 00 00	Last received sequence of 0
<i>UnitNumber 3</i>	04	Unit 4
<i>UnitSequence3</i>	79 A1 00 00	Last received sequence of 41,337
<i>ParamGroupLength</i>	08 00	8 bytes for this parameter group
<i>ParamGroupType</i>	81	0x81 = Return Bitfields

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>MessageType</i>	25	0x25 = Order Acknowledgment
<i>NumberOfReturn</i>	03	3 bitfields to follow
<i>Bitfields</i>		
<i>ReturnBitfield1</i>	00	No bitfields from byte 1
<i>ReturnBitfield2</i>	41	<i>Symbol, Capacity</i>
<i>ReturnBitfield3</i>	05	<i>Account, ClearingAccount</i>
<i>ParamGroupLength</i>	0C 00	12 bytes for this parameter group
<i>ParamGroupType</i>	81	0x81 = Return Bitfields
<i>MessageType</i>	2C	0x2C = Order Execution
<i>NumberOfReturn</i>	07	7 bitfields to follow
<i>Bitfields</i>		
<i>ReturnBitfield1</i>	00	No bitfields from byte 1
<i>ReturnBitfield2</i>	41	<i>Symbol, Capacity</i>
<i>ReturnBitfield3</i>	07	<i>Account, ClearingFirm, ClearingAccount</i>
<i>ReturnBitfield4</i>	00	No bitfields from byte 4
<i>ReturnBitfield5</i>	40	<i>BaseLiquidityIndicator</i>
<i>ReturnBitfield6</i>	00	No bitfields from byte 6
<i>ReturnBitfield7</i>	01	<i>SubLiquidityIndicator</i>

3.2.2 Logout

A Logout is usually sent in response to a Logout Request. Any queued data is transmitted, a Logout is sent, and Cboe will close the connection. However, a Logout may also be sent if the Member violates the protocol specification (e.g., by moving backwards in sequence number).

The Logout contains the last transmitted sequence number for each unit, allowing the Member to check that their last received sequence number matches.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x08
<i>MatchingUnit</i>	5	1	Binary	Always 0 for session level messages.
<i>SequenceNumber</i>	6	4	Binary	Always 0 for session level messages.
<i>LogoutReason</i>	10	1	Alphanumeric	The reason why the Logout message was sent. U = User Requested E = End of Day A = Administrative ! = Protocol Violation
<i>LogoutReasonText</i>	11	60	Text	Human-readable text with additional information about the reason for logout. Particularly useful if <i>LogoutReason</i> = ! (Protocol Violation).
<i>LastReceived SequenceNumber</i>	71	4	Binary	Last inbound (Member to Cboe) message sequence number processed by Cboe.
<i>NumberOfUnits</i>	75	1	Binary	A number, <i>n</i> (possibly 0), of unit/sequence pairs to follow, one per unit from which the client has received messages.
<i>UnitNumber₁</i>		1	Binary	A unit number.
<i>UnitSequence₁</i>		4	Binary	Highest available sequence number for the unit.
...				
<i>UnitNumber_n</i>		1	Binary	A unit number.
<i>UnitSequence_n</i>		4	Binary	Highest available sequence number for the unit.

3.2.4 Replay Complete

See 'Section 2.2 – Login, Replay and Sequencing' for more information on Login, sequencing and replay.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x13
MatchingUnit	5	1	Binary	Always 0 for session level messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.

Example Replay Complete Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	08 00	8 bytes
<i>MessageType</i>	13	Replay Complete
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	00 00 00 00	Always 0 for session level messages

4 Application Messages

4.1 Member to Cboe

4.1.1 New Order

A `New Order` message consists of a number of required fields followed by a number of optional fields. The optional fields used are specified by setting bits in the `NewOrderBitfields`. Fields must be appended at the end of the message, starting with the lowest order enabled bit in the first bit field first.

Permitted input optional fields are described in ‘Section 5.1 – New Order’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x38
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>ClOrdID</i>	10	20	Text	Corresponds to <i>ClOrdID</i> (11) in Cboe FIX. ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>ClOrdID</i> matches a live order, the order will be rejected as duplicate. Note: Cboe only enforces uniqueness of <i>ClOrdID</i> values among currently live orders, which includes long-lived, persisting GTC/GTD orders. However, we strongly recommend that you keep your <i>ClOrdID</i> values unique.
<i>Side</i>	30	1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX. 1 = Buy 2 = Sell
<i>OrderQty</i>	31	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX. Order quantity. System limit is 999,999 contracts.
<i>NumberOfNewOrderBitfields</i>	35	1	Binary	Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
<i>NewOrderBitfield¹</i>	36	1	Binary	Bitfield identifying fields to follow.
....				
<i>NewOrderBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Required Order Attributes:

The following are required to be sent on new orders:

- Some form of symbology (see **Symbology** below);
- *Price* (limit orders) or *Price* and/or *OrdType* (limit order market orders); and,
- *Capacity*;

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

All price fields (*Price*, *StopPx*) must be entered as non-negative values.

All other values have defaults. See the table in **List of Options Fields** for additional information about each optional field, including its default value.

Symbology:

For additional information, refer to the Cboe US Equity and Options Symbology Reference.

Example New Order Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	59 00	89 bytes
<i>MessageType</i>	38	New Order
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>Side</i>	31	Buy
<i>OrderQty</i>	64 00 00 00	100 contracts
<i>NumberOfNewOrder Bitfields</i>	04	Four bitfields to follow
<i>NewOrderBitfield1</i>	04	Price
<i>NewOrderBitfield2</i>	C1	Symbol, Capacity, RoutingInst
<i>NewOrderBitfield3</i>	01	Account
<i>NewOrderBitfield4</i>	17	MaturityDate, StrikePrice, PutOrCall, OpenClose
<i>Price</i>	70 17 00 00 00 00 00 00	0.60
<i>Symbol</i>	4D 53 46 54 00 00 00 00	MSFT
<i>Capacity</i>	43	C = Customer
<i>RoutingInst</i>	52 00 00 00	R = Routable
<i>Account</i>	44 45 46 47 00 00 00 00 00 00 00 00 00 00 00 00	DEFG
<i>MaturityDate</i>	EF DB 32 01	2011-03-19
<i>StrikePrice</i>	98 AB 02 00 00 00 00 00	17.50
<i>PutOrCall</i>	31	1 = Call
<i>OpenClose</i>	4F	O = Open

4.1.2 New Order Cross (C1 and EDGX Only)

A New Order Cross message contains the details for both the agency (initiating) and contra side(s) of a cross order (such as a BAM order). The message consists of a number of required fields including *Symbol*, *Price*, *OrderQty*, and relevant clearing information for all parties, as well as a number of optional fields.

The first order in the list is the agency order, while the rest are contra side responses. There is a maximum of ten (10) contra-parties that can be supplied with the order, for a total of eleven (11) repeating groups, as described below.

In each repeating group, the *Side*, *AllocQty*, *ClOrdID*, *Capacity*, *OpenClose*, and *ClearingFirm* are always required. Beyond that, the bits in the *NewOrderCrossBitfields* control which fields are expected. Any fields that are specified in *NewOrderCrossBitfields* that appear in the repeating groups should not be supplied in the optional fields that come after the repeating groups.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Permitted input optional fields are described in ‘Section 5.2 – New Order Cross’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x41
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>CrossID</i>	10	20	Text	Corresponds to <i>CrossID</i> (548) in Cboe FIX. Day-unique identifier for the cross order chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
<i>CrossType</i>	30	1	Alphanumeric	Corresponds to <i>CrossType</i> (549) in Cboe FIX. Type of auction order being submitted. This indicates the type of auction that will be initiated upon order entry. 1 = Bats Auction Mechanism (“BAM”) (EDGX only), or Auction Internalization Mechanism (“AIM”) (C1 only) 2 = Qualified Contingent Cross (“QCC”) (C1 only) 3 = Solicitation Cross (“SAM”) (C1 only)
<i>CrossPrioritization</i>	31	1	Alphanumeric	Corresponds to <i>CrossPrioritization</i> (550) in Cboe FIX. Indicates which side of the cross order will be prioritized for execution. This identifies the Agency side. 1 = Buy 2 = Sell
<i>Price</i>	32	8	Binary Price	Corresponds to <i>Price</i> (44) in Cboe FIX. Auction Price. Must be non-negative.
<i>OrderQty</i>	40	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX. Order quantity. System limit is 999,999 contracts.
<i>NumberOfNewOrderCrossBitfields</i>	44	1	Binary	Bitfield identifying which bitfields are set
<i>NewOrderCrossBitfield¹</i>	45	1	Binary	Bitfield identifying fields to follow.
....				
<i>NewOrderCrossBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>GroupCnt</i>		2	Binary	Number of order allocations represented by repeating groups included in this cross order. Must be at least 2 (One agency and one contra), and no more than 11.
<i>Repeating Groups of...</i>				
<i>Side</i>		1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX. 1 = Buy

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

				2 = Sell
<i>AllocQty</i>		4	Binary	Corresponds to <i>AllocQty</i> (80) in Cboe FIX. Number of contracts for this party.
<i>ClOrdID</i>		20	Text	Corresponds to <i>ClOrdID</i> (11) in Cboe FIX. Day-unique ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>ClOrdID</i> matches a live order, the order will be rejected as duplicate. Note: Cboe only enforces uniqueness of <i>ClOrdID</i> values among currently live orders. However, we strongly recommend that you keep your <i>ClOrdID</i> values day-unique.
<i>Capacity</i>		1	Alpha	Corresponds to <i>OrderCapacity</i> (47) in Cboe FIX. C = Customer M = Market Maker F = Firm U = Professional Customer N = Non-Cboe Market Maker B = Broker-Dealer J = Joint Back Office
<i>OpenClose</i>		1	Alphanumeric	Corresponds to <i>OpenClose</i> (77) in Cboe FIX. Indicates status of client position in the option. O = Open C = Close N = None* *Orders with an <i>OrderCapacity</i> of "M" or "N" will not be required to specify <i>OpenClose</i> on their orders or may specify a value of "N". A <blank> will be sent to OCC. Contracts which are limited to closing only transactions with an <i>OpenClose</i> value of O will be rejected unless the <i>Capacity</i> field is M (Market Maker) and <i>TimeInForce</i> is 3 (Immediate or Cancel).
<i>GiveUpFirmID</i>		4	Alpha	Corresponds to <i>GiveUpFirmID</i> (9946) in Cboe FIX. EFID that will clear the trade.
<i>Account (Optional)</i>		16	Text	See List of Optional Fields .
<i>CMTANumber (Optional)</i>		4	Binary	See List of Optional Fields .
<i>ClearingAccount (Optional)</i>		4	Text	See List of Optional Fields .
<i>Optional fields. . .</i>				Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Required Order Attributes:

- Some form of symbology (see **Symbology** below)
- Agency order's *Side* must match the cross order's *CrossPrioritization*

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

- Each contra-party allocation must have the opposite *Side*
- Each side's cumulative *AllocQty* must equal the cross order's *OrderQty*

Symbology:

For additional information, refer to the Cboe US Equity and Options Symbology Reference.

Example New Order Cross Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	B0 00	176 bytes
<i>MessageType</i>	41	New Order Cross
<i>MatchingUnit</i>	00	Always 0 for inbound messages

4.1.3 New Complex Order (EDGX and C2 Only)

A New Complex Order message contains the details required to enter an order on a complex instrument created with previously entered New Complex Instrument request. The message is similar to a New Order with an additional repeating group of the positions for each leg. The positions must be in the order returned by the system in the Complex Instrument Accepted response message, not the order supplied in the New Complex Instrument request.

Permitted input optional fields are described in 'Section 5.3 – New Complex Order'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x4B
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>ClOrdID</i>	10	20	Text	Corresponds to <i>ClOrdID</i> (11) in Cboe FIX. ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>ClOrdID</i> matches a live order, the order will be rejected as duplicate. Note: Cboe only enforces uniqueness of <i>ClOrdID</i> values among currently live orders, which includes long-lived, persisting GTC/GTD orders. However, we strongly recommend that you keep your <i>ClOrdID</i> values unique.
<i>Side</i>	30	1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX. 1 = Buy 2 = Sell
<i>OrderQty</i>	31	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX. Order quantity. System limit is 999,999 contracts.
<i>NumberOfNewComplexOrderBitfields</i>	35	1	Binary	Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
<i>NewComplexOrderBitfield¹</i>	36	1	Binary	Bitfield identifying fields to follow.
....				
<i>NewComplexOrderBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>NoLegs</i>		1	Binary	Corresponds to <i>NoLegs</i> (555) in Cboe FIX. Indicates the number of repeating groups to follow. Must be a minimum of 2 and a maximum of 12.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Repeating Group *ComplexLegOrderInfo* must occur the number of times specified in *NoLegs*. Each field occurs in each group, in order as shown below. Optional fields occur only if corresponding bits in bitfields are set.

<i>LegPositionEffect</i>	1	Alphanumeric	<p>Corresponds to <i>LegPositionEffect</i> (564) in Cboe FIX.</p> <p>Indicates status of client position in option for this leg.</p> <p>O = Open C = Close N = None*</p> <p>*Only Orders with an <i>OrderCapacity</i> of "M" or "N" will be allowed to specify "N" for <i>LegPositionEffect</i>.</p> <p>Contracts which are limited to closing only transactions with a <i>LegPositionEffect</i> value of O will be rejected unless the <i>Capacity</i> field is M (Market Maker) and <i>TimeInForce</i> is 3 (Immediate or Cancel).</p>
<i>Optional fields...</i>			Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Required Order Attributes:

The following are required to be sent:

- *Symbol*
- *Price* only (limit orders) or *Price* and/or *OrdType* (limit or market orders); and,
- *Capacity*
- *LegPositionEffect*

All other values have defaults. See the table in **List of Options Fields** for additional information about each optional field, including its default value.

See the Cboe US Equity and Options Symbology Reference for information on symbology.

Example New Complex Order Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	4D 00	77 bytes
<i>MessageType</i>	4B	New Complex Order
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>Side</i>	31	Buy
<i>OrderQty</i>	64 00 00 00	100 contracts
<i>NumberOfNewOrder Bitfields</i>	02	Two bitfields to follow
<i>NewOrderBitfield1</i>	C4	<i>Price</i> , <i>Symbol</i> , <i>Capacity</i>
<i>NewOrderBitfield2</i>	03	<i>RoutingInst</i> , <i>Account</i>
<i>NoLegs</i>	03	Three legs
<i>LegPositionEffect</i>	4F	O = Open
<i>LegPositionEffect</i>	4F	O = Open
<i>LegPositionEffect</i>	4F	O = Open
<i>Price</i>	38 FF FF FF FF FF FF FF	-0.02
<i>Symbol</i>	00 00 00 00 00 43 31 00	0000C1

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Capacity	43	C = Customer
RoutingInst	42 00 00 00	B = Book only, COA eligible
Account	44 45 46 47 00 00 00 00 00 00	DEFG
	00 00 00 00 00 00	

4.1.4 New Order Cross Multileg (C1 Only)

A New Order Cross Multileg message contains the details for both the agency (initiating) and contra side(s) of a cross order (such as an AIM order). The two-sided order consists of a number of required fields including *Symbol*, *Price*, *OrderQty*, and relevant clearing information for both the agency and contra sides, as well as a number of optional fields. A maximum of ten (10) contra-parties will be accepted per order.

Cross Order Acknowledgement, Cross Order Rejected, and Cross Order Cancelled message types will be used by the Exchange to respond to New Order Cross Multileg messages.

Permitted input optional fields are described in ‘Section 5.4 – New Order Cross Multileg’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x5A
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>CrossID</i>	10	20	Text	Corresponds to <i>CrossID</i> (548) in Cboe FIX. Day-unique identifier for the cross order chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
<i>CrossType</i>	30	1	Alphanumeric	Corresponds to <i>CrossType</i> (549) in Cboe FIX. Type of auction order being submitted. This indicates the type of auction that will be initiated upon order entry. 1 = Auction Internalization Mechanism (“AIM”) 2 = Qualified Contingent Cross (“QCC”) 3 = Solicitation Cross (“SAM”)
<i>CrossPrioritization</i>	31	1	Alphanumeric	Corresponds to <i>CrossPrioritization</i> (550) in Cboe FIX. Indicates which side of the cross multileg order will be prioritized for execution. This identifies the Agency side. 1 = Buy 2 = Sell
<i>Price</i>	32	8	Binary Price	Corresponds to <i>Price</i> (44) in Cboe FIX. Auction Price. Must be non-negative.
<i>OrderQty</i>	40	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX. Order quantity. System limit is 999,999 contracts.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>NumberOfNewOrderCrossMultilegBitfields</i>	44	1	Bit Field	Bitfield identifying which bitfields are set.
<i>NewOrderCrossMultilegBitfield¹</i>	45	1	Bit Field	Bitfield identifying fields to follow.
....				
<i>NewOrderCrossMultilegBitfieldⁿ</i>		1	Bit Field	Last <i>bitfield</i> .
<i>GroupCnt</i>		2	Binary	Number of order allocations represented by repeating groups included in this cross order. Must be at least 2 (One agency and one contra), and no more than 11.
<i>Repeating Groups of...</i>				
<i>Side</i>		1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX. 1 = Buy 2 = Sell
<i>AllocQty</i>		4	Binary	Corresponds to <i>AllocQty</i> (80) in Cboe FIX. Number of contracts for this party.
<i>ClOrdID</i>		20	Text	Corresponds to <i>ClOrdID</i> (11) in Cboe FIX. Day-unique ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>ClOrdID</i> matches a live order, the order will be rejected as duplicate. Note: Cboe only enforces uniqueness of <i>ClOrdID</i> values among currently live orders. However, we strongly recommend that you keep your <i>ClOrdID</i> values day-unique.
<i>Capacity</i>		1	Alpha	Corresponds to <i>OrderCapacity</i> (47) in Cboe FIX. C = Customer M = Market Maker F = Firm U = Professional Customer N = Non-Cboe Market Maker B = Broker-Dealer J = Joint Back Office L = Non-Trading Permit Holder Affiliate
<i>GiveUpFirmID</i>		4	Alpha	Corresponds to <i>GiveUpFirmID</i> (9946) in Cboe FIX. EFID that will clear the trade.
<i>LegPositionEffects</i>		12	Alpha	Indicates status of the client position in the option for each complex option leg. This value String of characters "O", "C", and "N", equal in length to the number of option legs of the instrument. If an equity leg is present it will always be the last leg, and there is no position effect for the equity leg. O = Open C = Close N = None*

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

				<p>*Orders with an <i>Capacity</i> of “M” or “N” will not be required to specify a position effect on their orders or may specify a value of “N”. A <blank> will be sent to OCC.</p> <p>Contracts which are limited to closing only transactions with a value of “O” will be rejected unless the <i>Capacity</i> field is “M” (Market Maker) and <i>TimeInForce</i> is 3 (Immediate or Cancel).</p>
<i>Account (Optional)</i>		16	Text	See List of Optional Fields .
<i>CMTANumber (Optional)</i>		4	Binary	See List of Optional Fields .
<i>ClearingAccount (Optional)</i>		4	Text	See List of Optional Fields .
<i>ClearingOptionalData (Optional)</i>		16	Text	See List of Optional Fields .
<i>EquityPartyId (Optional)</i>		4	Alpha	See List of Optional Fields .
<i>EquityLegShortSell (Optional)</i>		1	Alpha	See List of Optional Fields .
<i>EquityExDestination (Optional)</i>		1	Alpha	See List of Optional Fields .
<i>Optional fields. . .</i>				Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Required Order Attributes:

- Some form of symbology (see **Symbology** below)
- Agency order’s *Side* must match the cross order’s *CrossPrioritization*
- Each contra-party allocation must have the opposite *Side*
- Each side’s cumulative *AllocQty* must equal the cross order’s *OrderQty*

Example New Order Cross Multileg Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	E3 00	227 bytes
<i>MessageType</i>	5A	New Order Cross Multileg
<i>MatchingUnit</i>	00	Always 0 for inbound messages

<i>AttributedQuote</i>	5A	Z = Attribute EFID and Client ID
<i>ClientID</i>	52 32 44 32	R2D2

4.1.5 Cancel Order

Request to cancel either a single order or mass cancellation of a group of orders. Note that this does not apply to open orders across multiple sessions.

A single order cancellation references the *CIOrdID* from a previous order (*OrigCIOrdID* field).

Order Cancel Request messages for GTC and GTD orders may continue to be issued anytime after the trading session ends at 4:00 PM ET (4:15 PM ET for select ETF's) and prior to the trading session disconnecting at 4:45 PM ET. All other order message types received after the market closes at 4:00 PM ET (4:15 PM ET for select ETF's) will be rejected.

Mass cancellation of a group of orders can be done with one of two methods, using either the *MassCancel* (legacy) or *MassCancelInst* optional fields. If both optional fields *MassCancel* and *MassCancelInst* are specified, the *Cancel Order* request will be rejected. **Members are encouraged to use the *MassCancelInst* method as the legacy *MassCancel* method will be deprecated in the future with notice.**

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Legacy Mass Cancel method:

- Populate the *MassCancel* required field (and do not specify the *MassCancelInst* optional field)
- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelId* if a single *Mass Cancel Acknowledgement* is requested.
- Specify the *MassCancelLockout* optional field to request subsequent rejection of new orders based on the level of *MassCancel* (i.e. Firm level, Risk Root level, or Custom Group Id level)

MassCancelInst method

- Specify the *MassCancelInst* optional field
- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelId* if the Acknowledgement Style is set to S or B
- Risk lockout is optionally specified using the *MassCancelInst* field. As a result, the *MassCancelLockout* field will be ignored when *MassCancelInst* is present.

The system limits the rate at which identical Mass Cancel requests can be submitted to the system. Requests are restricted to twenty (20) messages per second per port.

An identical Mass Cancel message is defined as a message having all of the same *CustomGroupID*, *Symbol*, *Clearing Firm*, *Lockout Instruction*, *Instrument Type Filter* and *GTC Order Filter* field values, as a previously received message.

Permitted input optional fields are described in 'Section 5.4 – Cancel Order'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x39
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>OrigClOrdID</i>	10	20	Text	Corresponds to <i>OrigClOrdID</i> (41) in Cboe FIX. <i>ClOrdID</i> of the order to cancel. For mass cancel requests, must be empty (all zeroes).
<i>NumberOfCancelOrderBitfields</i>	30	1	Binary	Bitfield identifying bitfields which are set. May be 0. Field values must be appended to the end of the message.
<i>CancelOrderBitfield¹</i>	31	1	Binary	Bitfield identifying fields to follow. Only present if <i>NumberOfCancelOrderBitfields</i> is non-zero.
...				
<i>CancelOrderBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Cancel Order Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	22 00	34 bytes

<i>MassCancelInst</i>	46 53 4C 42 00 00 00 00 00 00 00 00 00 00 00 00	F = Cancel orders matching clearing firm TEST S = Single ack L = Lockout symbol MSFT B = Cancel simple and complex

4.1.6 Modify Order

Request to modify an order. The order attributes to be modified are selected using *NumberOfModifyBitfields* and some number of bitfields to follow. *Price, OrderQty, OrdType, MaxFloor (BZX, C1, and C2 only), FrequentTraderID (C1 only),* and *StopPx* may be adjusted. Modifies will result in a loss of time priority unless the modification involves a decrease in *OrderQty*, or a change to *MaxFloor, FrequentTraderID, or StopPx*. *OrdType* may be adjusted from Limit to Market.

Changes in *OrderQty* result in an adjustment of the current order's *OrderQty*. The new *OrderQty* does not directly replace the current order's *LeavesQty*. Rather, a delta is computed from the current *OrderQty* and the replacement *OrderQty*. This delta is then applied to the current *LeavesQty*. If the resulting *LeavesQty* is less than or equal to zero, the order is cancelled. This results in safer behavior when the modification request overlaps partial fills for the current order, leaving the Member in total control of the share exposure of the order.

A *Modify Order* should not be issued until the *Order Acknowledgement* for the previous *New Order* or *Order Modified* message for the previous *Modify Order* has been received. The BOE handler will reject a new *Modify Order* if it has not been accepted or it has not seen the result of the prior modification from the Matching Engine. However, *Modify Order* requests that merely reduce *OrderQty* may be overlapped if the existing *CLOrdID* is reused, as long as the trading identifier has not been opted-in to daily limit trading risk controls. This is the only case where reuse of the *CLOrdID* is allowed.

The *OrderQty* and *Price* fields in the optional field block must be present on all *Modify Order* requests. Messages sent without *OrderQty* or *Price* fields will be rejected.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Permitted input optional fields are described in 'Section 5.5 – Modify Order'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x3A
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>ClOrdID</i>	10	20	Text	New <i>ClOrdID</i> for this order.
<i>OrigClOrdID</i>	30	20	Text	Corresponds to <i>OrigClOrdID</i> (41) in Cboe FIX. <i>ClOrdID</i> of the order to replace. In the case of multiple changes to a single order, this will be the <i>ClOrdID</i> of the most recently accepted change.
<i>NumberOfModifyOrderBitfields</i>	50	1	Binary	Bitfield identifying bitfields which are set. May be 0. Field values must be appended to the end of the message.
<i>ModifyOrder Bitfield¹</i>	51	1	Binary	Bitfield identifying fields to follow.
...				
<i>ModifyOrder Bitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Modify Order Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	3E 00	82 bytes
<i>MessageType</i>	3A	Modify Order
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence Number 100
<i>ClOrdID</i>	41 42 43 31 32 34 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC124
<i>OrigClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>NumberOfModifyOrderBitfields</i>	01	One bitfield to follow
<i>ModifyOrderBitfield1</i>	0C	<i>OrderQty, Price</i>
<i>OrderQty</i>	64 00 00 00	100 contracts
<i>Price</i>	08 E2 01 00 00 00 00 00	12.34

4.1.7 Quote Update

Support for Quote Update messages will be available based on following rollout schedule:

Target Date	Milestone
11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments
----------	--

Request to enter or update one or more quotes. *Quote Update* requests will be forwarded in their entirety to the matching engine instance as a single message and will be applied in a single transaction. This is more efficient in the BOE order handler process than the *Bulk Order* request which sends one message per bulk order as a separate order request to the matching engine. Optional bitfields are not supported for any response messages for quotes.

All options in a single *Quote Update* must trade under a single risk root. Requests which include options trading under multiple risk roots will be rejected in their entirety.

A quote is unique per port, EFID, and side. You may quote multiple price levels of depth using either multiple EFIDs on a single port or with the same EFID on multiple ports.

Quote requests are one-sided. To delete a quote, send an update with a zero price and size.

Quotes may utilize simple options only; complex options quotes may not be submitted.

All quotes will be automatically cancelled at the end of the trading day.

Quotes may be marked post only. If a quote would be displayed at a price that locks or crosses the NBBO, it will be rejected.

On BZX Options, quote prices at non-displayable increments are permitted. Prices will be adjusted to the most aggressive non-locking price. Quotes may work (but not display) to lock an away market. Once posted, quotes act as a Display Price Sliding order.

If a quote modification is rejected, the resting quote being modified is also cancelled.

Executions, unsolicited cancels, and unsolicited modification response messages from the exchange are different from those for orders. They are optimized for efficiency and contain some different data elements (e.g., *QuoteUpdateID*) than the respective messages for orders.

The *PreventMatch* field may not be specified on the *Quote Update* message, but may be defaulted at the port level. For Bulk Quoting ports, only Cancel Newest, Cancel Oldest, or Cancel Both are permitted. For ports not configured with Cancel Newest, Cancel Oldest, or Cancel Both, Match Trade Prevention will be disabled.

Capacity may not be changed when modifying a quote. To change *Capacity* of a resting quote, you must first send a quote with zero price and size and then re-enter the quote with the desired *Capacity*.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x55
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>QuoteUpdateID</i>	10	16	Text	ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. Responses, both to the Quote Update and any Quote Executions, Quote Cancellations, and Quote Modification messages will include this identifier. Note: Cboe only enforces uniqueness of <i>QuoteUpdateID</i> values among those not yet acknowledged by the ME. However, we strongly recommend that you keep your <i>QuoteUpdateID</i> values unique for a trading day.
<i>ClearingFirm</i>	26	4	Alpha	EFID that will clear the trade. If left blank, the port attribute value of 'Default EFID' is used.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>ClearingAccount</i>	30	4	Alpha	Corresponds to <i>OnBehalfOfSubID</i> (116) and <i>ClearingAccount</i> (440) in Cboe FIX. See List of Optional Fields for additional information.
<i>CMTANumber</i>	34	4	Binary	Corresponds to <i>CMTANumber</i> (439) in Cboe FIX. See List of Optional Fields for additional information.
<i>Account</i>	38	16	Text	Corresponds to <i>Account</i> (1) in Cboe FIX. See List of Optional Fields for additional information.
<i>CustomGroupID</i>	54	2	Binary	Optional. Used to group orders for use in <i>Purge Orders</i> . Set to 0 if functionality not needed.
<i>Capacity</i>	56	1	Alpha	Corresponds to <i>OrderCapacity</i> (47) in Cboe FIX. See List of Optional Fields for additional information.
<i>Reserved</i>	57	15	Binary	Reserved for future expansion. To maintain forward compatibility, fill with 0.
<i>SendTime</i>	72	8	DateTime	Time which the quote update was sent from the entering firm. Sent to CAT.
<i>PostingInstruction</i>	80	1	Text	P = Post Only (do not remove liquidity) B = Book Only (allow removal of liquidity, available for Market Makers only)
<i>SessionEligibility</i>	81	1	Text	R = Regular Trading Hours (RTH) only
<i>QuoteCnt</i>	82	1	Binary	Number of repeating groups included in this quote update. Allowed values are 1-20.
<i>Repeating Groups of ...</i>				
<i>Symbol</i>		6	Alphanumeric	Cboe native identifier
<i>Side</i>		1	Text	1 = Buy 2 = Sell
<i>OpenClose</i>		1	Text	Corresponds to <i>OpenClose</i> (77) in Cboe FIX. See List of Optional Fields for additional information.
<i>Price</i>		8	Binary	Limit price. To cancel an existing quote, specify a size of 0.
<i>OrderQty</i>		4	Binary	Order quantity. System limit is 999,999 contracts. To cancel an existing quote, specify a size of 0.
<i>Reserved</i>		12	Binary	Reserved for future expansion. To maintain forward compatibility, fill with 0.

Example Quote Update Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	91 00	145 bytes
<i>MessageType</i>	55	Quote Update
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>QuoteUpdateID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00	ABC123
<i>ClearingFirm</i>	41 42 43 44	ABCD
<i>ClearingAccount</i>	57 58 59 5A	WXYZ
<i>CMTANumber</i>	31 32 33 34	1234

<i>Symbol</i>	30 30 34 63 53 73	004cSs
<i>Side</i>	32	2 = Sell
<i>OpenClose</i>	4F	O = Open
<i>Price</i>	AC 07 01 00 00 00 00 00	6.75
<i>OrderQty</i>	F4 01 00 00	500 contracts
<i>Reserved</i>	00 00 00 00 00 00 00 00 00 00 00 00	Reserved

4.1.8 Quote Update (Short)

Support for *Quote Update (Short)* messages will be available based on following rollout schedule:

Target Date	Milestone
11/19/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

A shorter version of *Quote Update* which restricts the information which can be presented. Uses less bandwidth than the *Quote Update* message but messages presented to the Matching Engine are identical between both *Quote Update* and *Quote Update (Short)* messages.

Quote Update (Short) does not allow sending *Account* but a default for this field may be set at the port level. *CMTANumber* may never be included on a *Quote Update (Short)* message.

This message uses a smaller format *Price* and *OrderQty* on each quote update.

All other comments concerning *Quote Update* in the previous section apply to *Quote Update (Short)* equally.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x59
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>QuoteUpdateID</i>	10	16	Text	ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. Responses, both to the Quote Update and any Quote Executions, Quote Cancellations, and Quote Modification messages will include this identifier. Note: Cboe only enforces uniqueness of <i>QuoteUpdateID</i> values among those not yet acknowledged by the ME. However, we strongly recommend that you keep your <i>QuoteUpdateID</i> values unique for a trading day.
<i>ClearingFirm</i>	26	4	Alpha	EFID that will clear the trade. If left blank, the port attribute value of 'Default EFID' is used.
<i>ClearingAccount</i>	30	4	Alpha	Corresponds to <i>OnBehalfOfSubID</i> (116) and <i>ClearingAccount</i> (440) in Cboe FIX. See List of Optional Fields for additional information.

<i>OpenClose</i>	4F	O = Open
<i>Price</i>	AC 07 01 00	6.75
<i>OrderQty</i>	F4 01	500 contracts
<i>Reserved</i>	00 00	Reserved

4.1.9 Bulk Order

Support for Bulk Order messages will be deprecated with the introduction of new Quoting Interface messages and fields based on following rollout schedule:

Target Date	Milestone
11/09/18	Quoting messages available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Quoting messages available in EDGX Options Production Environment
01/25/19	Quoting messages available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk Order message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Request to place new orders and/or cancel existing orders pertaining to multiple series of a single OSI Root. The order attributes in common among all the orders are specified once. Attributes that differ for each individual order are specified in an array at the end of the message. **The array must contain at least 1 and not more than 200 repeating groups.**

In each repeating group, the symbol (Cboe native format) is always required. Beyond that, the bits in the *BulkOrderBitFields* control which fields are expected. If a field is present in the repeating group for which there is a corresponding field in the non-repeating part of the message (e.g., *OrderQty*), the value in the repeating group is always used.

When sending a two-sided bulk order, one may select one side where nothing should be changed by sending a non-zero *Price* and a zero *OrderQty* for the desired side. This particular combination tells the system to do nothing to the existing quote on this side.

Note that for the same side or a given symbol, non-zero bulk orders behave like new orders or cancel/replace orders, depending on whether an earlier bulk order is currently active for that symbol.

ISO and routable bulk orders are not supported.

Any Bulk Order that contains the *EchoText* field will be rejected.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Bulk Order Ports do not support GTCs or GTDs that expire on a future date.

Permitted input optional fields are described in 'Section 5.6 – Bulk Order'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x3B
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>ClOrdIDBatch</i>	10	20	Text	ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>ClOrdIDBatch</i> matches a live order, the order will be rejected as duplicate. Note: Cboe only enforces uniqueness of <i>ClOrdIDBatch</i> values among currently live orders, which includes long-lived, persisting GTC/GTD orders. However, we strongly recommend that you keep your <i>ClOrdIDBatch</i> values unique.
<i>Symbol</i>	30	6	Text	The underlying symbol.
<i>OrderQty</i>	36	4	Binary	The order quantity to apply to each new order if the corresponding <i>BidOrderQty</i> or <i>AskOrderQty</i> is not specified in the optional bitfields.
<i>GroupCnt</i>	40	2	Binary	Number of repeating groups included in this bulk order.
<i>NumberOfNewOrderBitfields</i>	42	1	Binary	Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
<i>NewOrderBitfield¹</i>	43	1	Binary	Bitfield identifying fields to follow.
....				
<i>NewOrderBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>NumberOfBulkOrderBitfields</i>		1	Binary	Bitfield identifying with bitfields are set. Field values must appear in each repeating group.
<i>BulkOrderBitfield¹</i>		1	Binary	Bitfield identifying fields to follow.
...				
<i>BulkOrderBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>NewOrder optional fields...</i>				
<i>Repeating Groups of ...</i>				
<i>Symbol (required)</i>		6	Alphanumeric	Corresponds to <i>Symbol</i> (55) in Cboe FIX. Cboe native identifier.
<i>OptionalBulkOrderGroupFields</i>				

Each order in a repeated group must contain a Cboe symbol, *Capacity*, and at least one of *BidShortPrice* or *AskShortPrice*. Also, *BidOrderQty* and/or *AskOrderQty* may be sent to override the *OrderQty* sent in the message body.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

A cancel may be effected by sending a *Price* and *OrderQty* of zero. In this case, any open order that exists because of an earlier *Bulk Order* message on that symbol/side is cancelled. Note that individual orders entered using a *New Order* message cannot be cancelled through use of a *Bulk Order* message.

All other values have defaults. See the table in **List of Optional Fields** for additional information about each optional field, including its default value.

For Cboe Symbology, please refer to the Cboe US Equity and Options Symbology Reference. Note that OSI symbology cannot be used in *Bulk Order* messages – only the Cboe native symbol is accepted.

Example Bulk Order Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	61 00	97 bytes
<i>MessageType</i>	3B	<i>Bulk Order</i>
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>ClOrdIDBatch</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>RiskRoot</i>	41 42 43 00 00 00	ABC
<i>OrderQty</i>	00 00 00 00	Chosen to be zero; will be supplied on individual series/sides
<i>GroupCnt</i>	02 00	Two series
<i>NumberOfNewOrder Bitfields</i>	04	Four bitfields to follow
<i>NewOrderBitfield1</i>	00	No fields in byte 1
<i>NewOrderBitfield2</i>	40	<i>Capacity</i>
<i>NewOrderBitfield3</i>	01	<i>Account</i>
<i>NewOrderBitfield4</i>	30	<i>OpenClose, CMTANumber</i>
<i>NumberOfBulkOrder Bitfields</i>	01	<i>One bitfield to follow</i>
<i>BulkOrderBitfield1</i>	03	<i>BidShortPrice, BidOrderQty</i>
<i>Capacity</i>	46	F = Firm
<i>Account</i>	44 45 46 47 00 00 00 00 00 00 00 00 00 00 00 00	DEFG
<i>OpenClose</i>	4F	O = Open
<i>CMTANumber</i>	CF 07 00 00	1999
<i>Symbol</i>	30 30 36 69 70 41	006ipA
<i>BidShortPrice</i>	C8 32 00 00	1.30
<i>BidOrderQty</i>	64 00 00 00	100 contracts
<i>Symbol</i>	30 30 34 63 53 73	004cSs
<i>BidShortPrice</i>	AC 07 01 00	6.75
<i>BidOrderQty</i>	F4 01 00 00	500 contracts

4.1.10 Purge Orders

Request to cancel a group of orders across all the firm's sessions. This differs from a mass cancel request sent via a `Cancel Order` message as the purge request is applied across all of the firm's sessions, not just the session on which the `Cancel Order` was received.

A purge request requires populating the *MassCancel* required field (legacy) or specifying the *MassCancelInst* optional field. If the *MassCancelInst* optional field is specified, the *MassCancel* required field will be ignored.

Members are encouraged to use the *MassCancelInst* method as the legacy *MassCancel* method will be deprecated in the future with notice.

In addition, the `Purge Orders` message accepts a list of up to 10 *CustomGroupID* values as part of the order matching filter. If both *RiskRoot* and a list of *CustomGroupID* values are specified, the `Purge Orders` request will be rejected.

Legacy Mass Cancel method:

- Populate the *MassCancel* required field (and do not specify the *MassCancelInst* optional field)
- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelId* if a single `Mass Cancel Acknowledgement` is requested.
- Specify the *MassCancelLockout* optional field to request subsequent rejection of new orders based on the level of *MassCancel* (i.e. Firm level, Risk Root level, or Custom Group Id level)

MassCancelInst method

- Specify the *MassCancelInst* optional field
- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelId* if the Acknowledgement Style is set to S or B.
- Risk lockout is optionally specified using the *MassCancelInst* field. As a result, the *MassCancelLockout* field will be ignored when *MassCancelInst* is present.

The system limits the rate at which identical Purge Orders requests can be submitted to the system. Requests are restricted to twenty (20) messages per second per port.

An identical Mass Cancel message is defined as a message having all of the same *CustomGroupID*, *Symbol*, *Clearing Firm*, *Lockout Instruction*, *Instrument Type Filter* and *GTC Order Filter* field values, as a previously received message. Permitted input optional fields are described in 'Section 5.7 – Purge Orders'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x47
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>MassCancel</i>	10	1	Alphanumeric	Corresponds to <i>MassCancel</i> (7693) in Cboe FIX. Indicates that a mass cancellation is being performed.
<i>NumberOfPurgeOrdersBitfields</i>	11	1	Binary	Bitfield identifying bitfields which are set. May be 0. Field values must be appended to the end of the message.
<i>PurgeOrderBitfield</i> ¹	12	1	Binary	Bitfield identifying fields to follow. Only present if <i>NumberOfPurgeOrdersBitfields</i> is non-zero.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>CustomGroupIDCnt</i>	13	1	Binary	Number of repeating <i>CustomGroupID</i> included in this message.
<i>CustomGroupID¹</i>		2	Binary	First <i>CustomGroupID</i> . Only present if <i>CustomGroupIDCnt</i> is non-zero.
...				
<i>CustomGroupIDⁿ</i>		2	Binary	Last <i>CustomGroupID</i> .
<i>Optional fields. . .</i>				

Example Purge Orders Message (legacy) with CustomGroupID and Lockout:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	29 00	41 bytes
<i>MessageType</i>	47	Purge Orders
<i>MatchingUnit</i>	0	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>MassCancel</i>	34	4 = clearing firm match, single ack
<i>NumberOfPurge</i>	01	One bitfield to follow
<i>OrderBitfields</i>		
<i>PurgeOrdersBitfield1</i>	13	<i>ClearingFirm, MassCancelLockout, MassCancelID</i>
<i>CustomGroupIDCnt</i>	02	Two CustomGroupIDs to follow
<i>CustomGroupID1</i>	BF BE	First <i>CustomGroupID</i> of 48831
<i>CustomGroupID2</i>	CO BE	Second <i>CustomGroupID</i> of 48832
<i>ClearingFirm</i>	54 45 53 54	TEST
<i>MassCancelLockout</i>	31	1 = lockout
<i>MassCancelID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123

Example Purge Orders Message (legacy) with Product Level Filter and no Lockout:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	2B 00	43 bytes
<i>MessageType</i>	47	Purge Orders
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>MassCancel</i>	34	4 = clearing firm match, single ack
<i>NumberOfPurge</i>	01	1 bitfield to follow
<i>OrderBitfields</i>		
<i>PurgeOrdersBitfield1</i>	1B	<i>ClearingFirm, MassCancelLockout, RiskRoot, MassCancelID</i>
<i>CustomGroupIDCnt</i>	00	No <i>CustomGroupID</i> to follow
<i>ClearingFirm</i>	54 45 53 54	TEST
<i>MassCancelLockout</i>	30	0 = no lockout
<i>RiskRoot</i>	41 42 43 00 00 00	ABC
<i>MassCancelID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Example Purge Orders Message with CustomGroupID and Lockout:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes
MessageLength	29 00	58 bytes
MessageType	47	Purge Orders
MatchingUnit	0	Always 0 for inbound messages
SequenceNumber	64 00 00 00	Sequence number 100
MassCancel	00	Not specified
NumberOfPurge	01	One bitfield to follow
OrderBitfields		
PurgeOrdersBitfield1	15	ClearingFirm, MassCancelInst, MassCancelID
CustomGroupIDCnt	02	Two CustomGroupIDs to follow
CustomGroupID1	BF BE	First CustomGroupID of 48831
CustomGroupID2	CO BE	Second CustomGroupID of 48832
ClearingFirm	54 45 53 54	TEST
MassCancelInst	46 53 4C 42 00 00 00 00 00 00	F = Cancel orders matching clearing firm
	00 00 00 00 00 00	TEST
		S = Single ack
		L = Lockout both CustomGroupIDs
		B = Cancel simple and complex
MassCancelID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00 00 00 00 00	

Example Purge Orders Message with Product Level Filter and no Lockout:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes
MessageLength	3C 00	60 bytes
MessageType	47	Purge Orders
MatchingUnit	0	Always 0 for inbound messages
SequenceNumber	64 00 00 00	Sequence number 100
MassCancel	00	Not specified
NumberOfPurge	01	One bitfield to follow
OrderBitfields		
PurgeOrdersBitfield1	1D	ClearingFirm, MassCancelInst, RiskRoot, MassCancelID
CustomGroupIDCnt	00	No CustomGroupIDs to follow
ClearingFirm	54 45 53 54	TEST
MassCancelInst	46 53 4E 42 00 00 00 00 00 00	F = Cancel orders matching clearing firm
	00 00 00 00 00 00	TEST
		S = Single ack
		N = No lockout
		B = Cancel simple and complex
RiskRoot	41 42 43 00 00 00	ABC
MassCancelID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00 00 00 00 00	

4.1.11 Reset Risk

Support for Reset Risk messages will be available based on following rollout schedule:

Target Date	Milestone
-------------	-----------

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Reset or release Firm, Risk Root, or Custom Group ID level lockout conditions resulting from risk profile trips or self-imposed lockouts issued via `Cancel Order` or `Purge Orders` messages. Risk resets can be performed using this message or by using the `RiskReset` field on a `New Order` message.

Field	Offset	Length	Data Type	Description
<code>StartOfMessage</code>	0	2	Binary	Must be 0xBA 0xBA.
<code>MessageLength</code>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <code>StartOfMessage</code> field.
<code>MessageType</code>	4	1	Binary	0x56
<code>MatchingUnit</code>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<code>SequenceNumber</code>	6	4	Binary	The sequence number for this message.
<code>RiskStatusID</code>	10	16	Text	Unique identifier for this Reset Risk request. Response message will have this corresponding identifier. Note: Cboe only enforces uniqueness of <code>RiskStatusID</code> values among currently unacknowledged requests. However, we strongly recommend that you keep your <code>RiskStatusID</code> values day-unique.
<code>RiskReset</code>	26	8	Text	Corresponds to <code>RiskReset</code> (7692) in Cboe FIX. Indicates Risk Root, Firm, or CustomGroupID lockout reset. See List of Optional Fields for allowed values.
<code>Reserved</code>	34	4	Binary	Reserved for future expansion. To maintain forward compatibility, fill with 0.
<code>ClearingFirm</code>	38	4	Alpha	Risk will be reset for this EFID.
<code>RiskRoot</code>	42	6	Alphanumeric	Populate with Risk Root for resets at the Risk Root level. Leave empty for resets at the firm level.
<code>CustomGroupID</code>	48	2	Binary	Populate with an identifier for resets including a CustomGroupID. Set to 0 to ignore.

Example Reset Risk Message:

Field Name	Hexadecimal	Notes
<code>StartOfMessage</code>	BA BA	Start of message bytes.
<code>MessageLength</code>	30 00	48 bytes
<code>MessageType</code>	56	Reset Risk
<code>MatchingUnit</code>	00	Always 0 for inbound messages
<code>SequenceNumber</code>	64 00 00 00	Sequence number 100
<code>RiskStatusID</code>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00	ABC123
<code>RiskReset</code>	53 46 00 00 00 00 00 00	SF = Symbol and Firm level reset
<code>Reserved</code>	00 00 00 00	
<code>ClearingFirm</code>	54 45 53 54	TEST

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>RiskRoot</i>	41 42 43 00 00 00	ABC
<i>CustomGroupID</i>	00 00	No <i>CustomGroupID</i>

4.1.12 New Complex Instrument (C1, C2, and EDGX Only)

A *New Complex Instrument* message is used to request that the system create a complex strategy. The resulting symbol (if accepted by the system) will be returned in a *Complex Instrument Accepted* message; a *Complex Instrument Rejected* message will be sent if it is not accepted. All legs must have the same underlying product which can be different OSI Roots (i.e. XYZ and XYZ1).

A *ClearingFirm* must be sent on each *New Complex Instrument* message unless a Default Executing Firm ID is set at the port-level.

Permitted input optional fields are described in ‘Section 5.8 – New Complex Instrument’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x4C
<i>MatchingUnit</i>	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message.
<i>CIOrdID</i>	10	20	Text	Corresponds to <i>CIOrdID</i> (11) in Cboe FIX. Day-unique ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>CIOrdID</i> matches a live order, the order will be rejected as duplicate. Note: Cboe only enforces uniqueness of <i>CIOrdID</i> values among currently live orders. However, we strongly recommend that you keep your <i>CIOrdID</i> values day-unique.
<i>NumberOfNewComplexInstrumentBitfields</i>	30	1	Binary	Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
<i>NewComplexInstrumentBitfield¹</i>	31	1	Binary	Bitfield identifying fields to follow.
....				
<i>NewComplexInstrumentBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>NoLegs</i>		1	Binary	Corresponds to <i>NoLegs</i> (555) in Cboe FIX. Indicates the number of repeating groups to follow. Must be a minimum of 2 and a maximum of 12.
Repeating Group <i>ComplexLeg</i> must occur the number of times specified in <i>NoLegs</i> . Each field occurs in each group, in order as shown below. Optional fields occur only if corresponding bits in bitfields are set.				
<i>LegSymbol</i>	8	Alphanumeric	Corresponds to <i>LegSymbol</i> (600) in Cboe FIX. Entire Cboe format symbol or OSI Root. Must send <i>LegCFIcode</i>, <i>LegMaturityDate</i>, and <i>LegStrikePrice</i> if using OSI format.	
<i>LegCFIcode</i>	6	Alphanumeric	Corresponds to <i>LegCFIcode</i> (608) in Cboe FIX.	

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

(Optional)			CFI Code for leg. Required if <i>LegSymbol</i> is in OSI format. OP = Options Put OC = Options Call E = Equity
<i>LegMaturityDate</i> (Optional)	4	Date	Corresponds to <i>LegMaturityDate</i> (611) in Cboe FIX. Required if <i>LegSymbol</i> is in OSI format.
<i>LegStrikePrice</i> (Optional)	8	Binary Price	Corresponds to <i>LegStrikePrice</i> (612) in Cboe FIX. Option strike price. System maximum is 99,999,999. Must be non-negative. Required if <i>LegSymbol</i> is in OSI format.
<i>LegRatioQty</i>	4	Binary	Corresponds to <i>LegRatioQty</i> (623) in Cboe FIX. Ratio of number of contracts in this leg per order quantity. Must be between 1 and 99,999.
<i>LegSide</i>	1	Alphanumeric	Corresponds to <i>LegSide</i> (624) in Cboe FIX. 1 = Buy 2 = Sell
Optional fields...			Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Example New Complex Instrument Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	61 00	97 bytes
<i>MessageType</i>	4C	New Complex Instrument
<i>MatchingUnit</i>	00	Always 0 for inbound messages
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>CIOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>NumberOfNewComplex</i>	01	One bitfield to follow
<i>InstrumentBitfields</i>		
<i>NewComplex</i>	0F	<i>LegCFICode</i> , <i>LegMaturityDate</i> , <i>LegStrikePrice</i> , <i>ClearingFirm</i>
<i>InstrumentBitfield1</i>		
<i>NoLegs</i>	02	Two legs
<i>LegSymbol</i>	4D 53 46 54 00 00 00 00	MSFT
<i>LegCFICode</i>	4F 43 00 00 00 00	OC = Option Call
<i>LegMaturityDate</i>	EF DB 32 01	2011-03-19
<i>LegStrikePrice</i>	98 AB 02 00 00 00 00 00	17.50
<i>LegRatioQty</i>	02 00 00 00	Ratio of 2
<i>LegSide</i>	31	Buy
<i>LegSymbol</i>	4D 53 46 54 00 00 00 00	MSFT
<i>LegCFICode</i>	4F 50 00 00 00 00	OP = Option Put
<i>LegMaturityDate</i>	F6 DB 32 01	2011-03-26
<i>LegStrikePrice</i>	30 E6 02 00 00 00 00 00	19.00
<i>LegRatioQty</i>	01 00 00 00	Ratio of 1
<i>LegSide</i>	32	Sell
<i>ClearingFirm</i>	54 45 53 54	TEST

4.2 Cboe to Member

4.2.1 Order Acknowledgment

`Order Acknowledgment` messages are sent in response to `New Order` and `New Complex Order` messages. The message corresponds to a FIX Execution Report with `ExecType` (150) = 0 (New).

Per the instructions given in a Return Bitfields Parameter Group on the `Login Request` (Section 3.1.1 – Login Request), optional fields may be appended to echo back information provided in the original `New Order` message. Fields which have been requested to be echoed back but which were not filled in will still be sent, but filled with binary zero (0x00).

Permitted return optional fields are described in ‘Section 6.1 – Order Acknowledgement’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x25
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	Echoed back from the original order.
<i>OrderID</i>	38	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. Order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
<i>ReservedInternal</i>	46	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	47	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	48	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Order Acknowledgment Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	4E 00	78 bytes
<i>MessageType</i>	25	<code>Order Acknowledgment</code>
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00	ABC123
<i>OrderID</i>	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
<i>ReservedInternal</i>	00	Ignore

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>NumberOfReturn Bitfields</i>	03	Three bitfields to follow
<i>ReturnBitfield1</i>	00	No bitfields from byte 1
<i>ReturnBitfield2</i>	41	<i>Symbol, Capacity</i>
<i>ReturnBitfield3</i>	05	<i>Account, ClearingAccount</i>
<i>Symbol</i>	31 32 33 61 42 63 00 00	<i>123aBc</i>
<i>Capacity</i>	50	P = Principal
<i>Account</i>	41 42 43 00 00 00 00 00 00	ABC
	00 00 00 00 00 00	
<i>ClearingAccount</i>	00 00 00 00	

Example Minimal Order Acknowledgment Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	2E 00	46 bytes
<i>MessageType</i>	25	Order Acknowledgment
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>OrderID</i>	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn Bitfields</i>	00	No bitfields to follow

4.2.2 Cross Order Acknowledgment (C1 and EDGX Only)

Cross Order Acknowledgment messages are sent in response to New Order Cross and New Order Cross Multileg messages. The message corresponds to a FIX Execution Report with *ExecType* (150) = 0 (New). In FIX, multiple execution reports could be generated from one new cross order message.

Per the instructions given in a Return Bitfields Parameter Group on the Login Request (Section 3.1.1 – Login Request), optional fields may be appended to echo back information provided in the original New Order Cross message. Fields which have been requested to be echoed back but which were not filled in will still be sent, but filled with binary zero (0x00).

In each repeating group, the *ClOrdID* and *OrdId* are always returned. Beyond that, the bits specified in the optional return bitfields parameter group control which fields are returned. Any fields that appear in the repeating groups will not appear in the optional fields that come after the repeating groups.

Permitted return optional fields are described in ‘Section 6.2 – Cross Order Acknowledgement’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x43
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>CrossID</i>	18	20	Text	Corresponds to <i>CrossID</i> (548) in Cboe FIX. Echoed back from the original order.
<i>AuctionId</i>	38	8	Binary	Corresponds to <i>AuctionId</i> (9370) in Cboe FIX. Auction order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
<i>ReservedInternal</i>	46	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	47	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	48	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>GroupCnt</i>		2	Binary	Number of order allocations represented by repeating groups included in this message.
<i>Repeating Groups Of...</i>				
<i>ClOrdId</i>		20	Text	Echoed back from the original order.
<i>Side (Optional)</i>		1	Alphanumeric	See List of Optional Fields .
<i>AllocQty (Optional)</i>		4	Binary	See List of Optional Fields .
<i>Capacity (Optional)</i>		1	Alpha	See List of Optional Fields .
<i>OpenClose (Optional)</i>		1	Alphanumeric	See List of Optional Fields .
<i>GiveUpFirmID (Optional)</i>		4	Alpha	See List of Optional Fields .
<i>Account (Optional)</i>		16	Text	See List of Optional Fields .
<i>CMTANumber (Optional)</i>		4	Binary	See List of Optional Fields .
<i>ClearingAccount (Optional)</i>		4	Text	See List of Optional Fields .
<i>Optional fields. . .</i>				Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Example Cross Order Acknowledgment Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	91 00	145 bytes
<i>MessageType</i>	43	Cross Order Acknowledgment
<i>MatchingUnit</i>	02	Matching Unit 2
<i>SequenceNumber</i>	01 00 00 00	Sequence number 1
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>CrossID</i>	4E 5A 31 56 37 42 4A 5F 41 63 63 65 70 74 42 75 79 00 00 00	NZ1V7BJ_AcceptBuy

4.2.3 Quote Update Acknowledgment

Support for Quote Update Acknowledgment messages will be available based on following rollout schedule:

Target Date	Milestone
11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Quote Update Acknowledgment messages are sent in response to a Quote Update message. The effect of each requested update will be found in this response. The ordering between request and response is preserved.

For quotes not marked post only which are priced at an executable price and which may remove liquidity against non-Market Maker liquidity, *QuoteResult* reason of “D” or “d” will be provided. In these cases, executions or cancellations (as needed) will immediately follow as additional messages. In some cases, an execution may not be permitted (e.g., risk management causes cancellation of the targeted order before execution), no additional messages will follow and the quote will post.

In some cases, a new *OrderID* will be assigned for an existing quote. There are currently two situations where this occurs, but others may be added in the future:

1. A partially executed quote will be assigned a new *OrderID* on a quote update.
2. An order which has received a large number of quote updates over its life will be assigned a new *OrderID* if receiving an update which would cause a loss in priority.

If using the *OrderID* in your system or to correlate with an *OrderID* on PITCH, always be prepared to receive an update on an Quote Update Acknowledgment.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x51

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>QuoteUpdateID</i>	18	16	Text	Echoed back from the Quote Update request.
<i>QuoteRejectReason</i>	34	1	Text	Reason for rejection of an entire <i>Quote Update</i> message by the matching engine. If an error is indicated, then no quotes were entered or updated. <i>QuoteCnt</i> will be 0. <space> = Success See Quote Reason Codes for a list of possible quote reject codes. Additional reasons may be added in the future without warning.
<i>Reserved</i>	35	17	Binary	Reserved for future expansion. Filled with 0.
<i>QuoteCnt</i>	52	1	Binary	Number of repeating groups included in this acknowledgment. Allowed values are 1-20.
<i>Repeating Groups of ...</i>				
<i>OrderID</i>		8	Binary	Order ID assigned by the matching engine. Corresponds to order ID on PITCH.
<i>QuoteResult</i>		1	Text	Result of the quote request. <i>Acceptance:</i> A = New Quote L = Modified; loss of priority R = Modified; retains priority (size reduction) N = No change, matches existing quote D = New Quote, but may remove liquidity d = Modified, but may remove liquidity <i>Cancellation:</i> U = User cancelled (zero size/price requested) <i>Rejection:</i> J = Rejected, risk tripped P = Rejected, can't post f = Risk management firm or Custom Group ID level S = Rejected, symbol not found p = Rejected, invalid price s = Invalid Remove s = Risk management risk root level u = Rejected, other reason + = Risk management EFID Group level Additional reasons indicating a reject may be added in the future with no notice.
<i>SubLiquidity Indicator</i>		1	Text	N = Normal S = NBBO Setter J = NBBO Joiner

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

				T = Market Turner (C1 only) <space> = No quote on book New values may be added in the future without warning.
Reserved		6	Binary	Reserved for future expansion. Filled with 0.

Example Quote Update Acknowledgment Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	53 00	83 bytes
MessageType	51	Quote Update Acknowledgment
MatchingUnit	03	Matching Unit 3
SequenceNumber	64 00 00 00	Sequence number 100
TransactionTime	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
QuoteUpdateID	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00	ABC123

OrderID	06 10 1E B7 5E 39 2F 02	171WC1000006 (base 36)
QuoteResult	4C	L = Modified, loss of priority
SubLiquidityIndicator	53	S = NBBO Setter
Reserved	00 00 00 00 00 00	

4.2.4 Bulk Order Acknowledgment

Bulk Order Acknowledgment messages are sent in response to a Bulk Order message. Each Bulk Order message generates exactly one Bulk Order Acknowledgment, with the possibility of one or more Order Rejected or Cancel Rejected messages relating to the bulk order in between, depending on the return bits enabled in the Login Request. Note that other Cboe to Member messages may be interspersed with these (i.e., the Bulk Order to Bulk Order Acknowledgment sequence is not atomic).

Per the instructions given in the Login Request, optional fields may be appended to echo back groups of order IDs and reject reasons for the individual orders specified in the generated Bulk Order message. If the *BulkOrderIDs* bit has been set in the Login Request, a number of *BidOrderID* and/or *AskOrderID* values will be returned as necessary. If the *BulkOrderIDs* bit has not been set, then no order IDs will be returned.

If the *BulkRejectReasons* bit has been set in the Login Request, reject reason (*AskRejectReason* or *BidRejectReason*) will be returned for each order that has been rejected. If the *BulkRejectReasons* bit has not been set, then the reject reasons will not be aggregated and returned via the Bulk Order Acknowledgment message. Instead, Order Rejected or Cancel Rejected messages will be returned to the Member for each individual order as appropriate.

The ordering of each group of order IDs and reject reasons in a Bulk Order Acknowledgment message directly corresponds with the ordering of each group of individual orders specified in the Bulk Order message.

Fields which have been requested to be echoed back, but which were not filled in, will still be sent and will be filled with their empty value.

Permitted return optional fields are described in ‘Section 6.3 – Bulk Order Acknowledgement’.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x2F
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdIDBatch</i>	18	20	Text	Echoed back from the original Bulk Order message.
<i>GroupCnt</i>	38	2	Binary	Number of repeating groups of order IDs and/or reject reasons appended.
<i>AcceptedCount</i>	40	2	Binary	Number of accepted orders (with either new or cancel/replace semantics) from the original Bulk Order message.
<i>RejectedCount</i>	42	2	Binary	Number of rejected orders from the original Bulk Order message. Note that if <i>GroupCnt</i> , <i>RejectedCount</i> , and <i>AcceptedCount</i> fields are all zero, this indicates a batch-level reject of the entire Bulk Order message (no individual Order Rejected messages will be sent), in which case the <i>OrderRejectReason</i> and <i>Text</i> fields will be populated.
<i>BulkOrderReject Reason</i>	44	1	Text	Reason for rejection of an entire Bulk Order message. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	45	60	Text	Human readable text with more information about the reject reason.
<i>ReservedInternal</i>	105	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	106	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	107	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Repeating Groups Of...</i>				
<i>BidOrderID (Optional)</i>		8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. A kind of <i>BulkOrderID</i> . Order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
<i>BidRejectReason (Optional)</i>		1	Text	Reason for the individual order rejection. See Order Reason Codes for a list of possible reasons.
<i>AskOrderID (Optional)</i>		8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. A kind of <i>BulkOrderID</i> . Order identifier supplied

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

				by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
<i>AskRejectReason (Optional)</i>		1	Text	Reason for the individual order rejection. See Order Reason Codes for a list of possible reasons.

Example Bulk Order Acknowledgment Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	93 00	147 bytes
<i>MessageType</i>	2F	Bulk Order Acknowledgment
<i>MatchingUnit</i>	00	Unsequenced message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>GroupCnt</i>	02 00	Two repeating groups
<i>AcceptedCount</i>	03 00	Three accepted orders
<i>RejectedCount</i>	01 00	One rejected order
<i>BulkOrderRejectReason</i>	00	Batch not rejected
<i>Text</i>	00 00	(empty)
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn</i>	06	Six bitfields to follow
<i>Bitfields</i>		
<i>ReturnBitfield1</i>	00	No bitfields from byte 1
<i>ReturnBitfield2</i>	00	No bitfields from byte 2
<i>ReturnBitfield3</i>	00	No bitfields from byte 3
<i>ReturnBitfield4</i>	00	No bitfields from byte 4
<i>ReturnBitfield5</i>	00	No bitfields from byte 5
<i>ReturnBitfield6</i>	00	<i>BulkOrderIDs, BulkRejectReasons</i>
<i>BidOrderID</i>	00 00 00 00 00 00 00 00	(empty)
<i>BidRejectReason</i>	41	A = Admin
<i>AskOrderID</i>	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
<i>AskRejectReason</i>	00	Not rejected
<i>BidOrderID</i>	06 10 1E B7 5E 39 2F 02	171WC1000006 (base 36)
<i>BidRejectReason</i>	00	Not rejected
<i>AskOrderID</i>	09 10 1E B7 5E 39 2F 02	171WC1000009 (base 36)
<i>AskRejectReason</i>	00	Not rejected

4.2.5 Order Rejected

Order Rejected messages are sent in response to a New Order which must be rejected. This message corresponds to a FIX Execution Report with *ExecType* (150) = 8 (Rejected). Order Rejected messages are unsequenced.

Permitted return optional fields are described in 'Section 6.4 – Order Rejected'.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x26
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	Echoed back from the original order.
<i>OrderRejectReason</i>	38	1	Text	Reason for an order rejection. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	39	60	Text	Human readable text with more information about the reject reason.
<i>ReservedInternal</i>	99	1	Binary	Reserved for Cboe internal use.

<i>ClearingAccount</i>	00 00 00 00	(empty)
<i>MaturityDate</i>	EF DB 32 01	2011-03-19
<i>StrikePrice</i>	98 AB 02 00 00 00 00 00	17.50
<i>PutOrCall</i>	31	1 = Call
<i>OpenClose</i>	4F	0 = Open

4.2.6 Cross Order Rejected (C1 and EDGX Only)

Cross Order Rejected messages are sent in response to a New Order Cross and NewOrderCrossMultileg which must be rejected. This message corresponds to a FIX Execution Report with *ExecType* (150) = 8 (Rejected). Order Rejected messages are unsequenced.

Permitted return optional fields are described in 'Section 6.5 – Cross Order Rejected'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x44
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>CrossID</i>	18	20	Text	Echoed back from the original order.
<i>OrderRejectReason</i>	38	1	Text	Reason for an order rejection. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	39	60	Text	Human readable text with more information about the reject reason.
<i>ReservedInternal</i>	99	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	100	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	101	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Example Cross Order Rejected Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	59 00	89 bytes
<i>MessageType</i>	44	Cross Order Rejected
<i>MatchingUnit</i>	0	Unsequenced message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>OrderRejectReason</i>	41	A
<i>Text</i>	53 65 72 69 65 73 20 6E 6F 74 20 63 75 72 72 65 6E 74 6C 79 20 74 72 61 64 69 6E 67 00	Series not currently trading
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn</i>	02	Two bitfields to follow
<i>Bitfields</i>		
<i>ReturnBitfield1</i>	00	No bitfields from byte 1
<i>ReturnBitfield2</i>	01	<i>Symbol</i>
<i>Symbol</i>	30 30 51 30 6B 41 00 00	00Q0kA

4.2.7 Quote Update Rejected

Support for Quote Update Rejected messages will be available based on following rollout schedule:

Target Date	Milestone
11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Quote Update Rejected messages are sent in response to a Quote Update message when the entire quote block is rejected by the order handler. No existing quotes are updated or cancelled as a result.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x58
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>QuoteUpdateID</i>	18	16	Text	Echoed back from the Quote Update request.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>QuoteRejectReason</i>	34	1	Text	Reason for rejection of an entire <i>Quote Update</i> message. See Quote Reason Codes for a list of possible quote reject codes. Additional reasons may be added in the future without warning.
<i>Reserved</i>	35	17	Binary	Reserved for future expansion. Filled with 0.

Example Quote Update Rejected Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	32 00	50 bytes
<i>MessageType</i>	58	<i>Quote Update Rejected</i>
<i>MatchingUnit</i>	0	Unsequenced message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>QuoteUpdateID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>QuoteRejectReason</i>	4D	M = symbols not on same matching engine
<i>Reserved</i>	00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00	Reserved

4.2.8 Order Modified

Order Modified messages are sent in response to a *Modify Request* to indicate that the order has been successfully modified.

Note: You must opt-in to receiving *LeavesQty* in *Order Modified* messages. In some cases, the last message to be received on an order's lifecycle will be an *Order Modified* message. The way to know the order is no longer live is to inspect *LeavesQty*. An example of this would be modification of an order whilst an execution is being generated, resulting in the order being reduced to zero outstanding quantity.

Permitted return optional fields are described in 'Section 6.6 – Order Modified'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x27
<i>MatchingUnit</i>	5	1	Binary	The Matching Unit which created this message. Matching units in BOE correspond to Matching Units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per Matching Unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	Client order ID. This is the <i>ClOrdID</i> from the <i>Modify Order</i> message.
<i>OrderID</i>	38	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

				The unique <i>OrderID</i> . Modifications do <i>not</i> change the <i>OrderID</i> .
<i>ReservedInternal</i>	46	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	47	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	48	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Order Modified Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	35 00	63 bytes
<i>MessageType</i>	27	Order Modified
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>OrderID</i>	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturnBitfields</i>	05	Five bitfields to follow
<i>ReturnBitfield1</i>	04	<i>Price</i>
<i>ReturnBitfield2</i>	00	No fields from byte 2
<i>ReturnBitfield3</i>	00	No fields from byte 3
<i>ReturnBitfield4</i>	00	No fields from byte 4
<i>ReturnBitfield5</i>	02	<i>LeavesQty</i>
<i>Price</i>	08 E2 01 00 00 00 00 00	12.34
<i>LeavesQty</i>	00 00 00 00	0 (order done)

4.2.9 Order Restated

Order Restated messages are sent to inform the Member that an order has been asynchronously modified for some reason without an explicit *Modify Order* request having been sent. Some example (non-exhaustive) reasons for *Order Restated* messages being sent:

- A reserve (iceberg) order has been reloaded (**BZX , C1, and C2 Only**).
- An order's remaining quantity was decremented because of a prevented wash trade.
- An order is represented on the Cboe Options Trading Floor (**C1 Only**).
- A routed order has returned to rest on the book after matching liquidity on another market.

Members should be prepared to accept and apply *Order Restated* messages for any reason. The return bitfields indicate the characteristics of the order which have changed. Optional fields will be present at the end of the message with the new values.

Note: You must opt-in to receiving *LeavesQty* in *Order Restated* messages. In some cases, the last message to be received on an order's lifecycle will be an *Order Restated* message. The way to know the order is no longer live

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

is to inspect *LeavesQty*. An example of this would be restatement of an order in some cases due to *PreventMatch* being set to d.

Permitted return optional fields are described in ‘Section 6.7 – Order Restated’.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x28
<i>MatchingUnit</i>	5	1	Binary	The Matching Unit which created this message. Matching units in BOE correspond to Matching Units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per Matching Unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	The <i>ClOrdID</i> is the identifier from the open order.
<i>OrderID</i>	38	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. The unique <i>OrderID</i> . For informational purposes only. Restatements do <i>not</i> change the <i>OrderID</i> .
<i>RestatementReason</i>	46	1	Alphanumeric	The reason for this Order Restated message. E = Reduction of OrdQty due to Equity Leg Reject (C1 only) F = Represented on Floor (C1 only) L = Reload P = Price Sliding Reprice Q = Liquidity Updated R = Reroute S = Ship and Post (SWP) W = Wash Cboe reserves the right to add new values as necessary without prior notice.
<i>ReservedInternal</i>	47	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	48	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	49	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Order Restated Message for a reserve (iceberg) reload:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	41 00	65 bytes
<i>MessageType</i>	27	Order Restated
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>OrderID</i>	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
<i>RestatementReason</i>	4C	L = Reload
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn</i>	06	Six bitfields to follow
<i>Bitfields</i>		
<i>ReturnBitfield1</i>	00	No fields from byte 1
<i>ReturnBitfield2</i>	00	No fields from byte 2
<i>ReturnBitfield3</i>	00	No fields from byte 3
<i>ReturnBitfield4</i>	00	No fields from byte 4
<i>ReturnBitfield5</i>	02	<i>LeavesQty</i>
<i>ReturnBitfield6</i>	01	<i>SecondaryOrderID</i>
<i>LeavesQty</i>	64 00 00 00	100 contracts
<i>SecondaryOrderID</i>	0A 10 1E B7 5E 39 2F 02	171WC100000A (base 36)

4.2.10 Quote Restated

Support for *Quote Restated* messages will be available based on following rollout schedule:

Target Date	Milestone
11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Quote Restated messages are sent to inform the Member that an order has been asynchronously modified for some reason by the Exchange. For quotes, this would happen if the MTP decrement method has been used by an inbound order against a resting quote. On BZX Options, if a hidden working price is covered by an inbound post only order or quote, a restatement will also occur. Additional reasons may be added in the future.

This message may be expanded in length in the future with new fields added to the end. To maintain forward compatibility, be prepared to receive a message longer than the documented length and to gracefully ignore those extra fields.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x52
<i>MatchingUnit</i>	5	1	Binary	The Matching Unit which created this message. Matching units in BOE correspond to Matching Units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per Matching Unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>QuoteUpdateID</i>	18	16	Text	Echoed back from the most recent <i>Quote Update</i> request for this quote.
<i>OrderID</i>	34	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. The unique <i>OrderID</i> . For informational purposes only. Restatements do <i>not</i> change the <i>OrderID</i> .
<i>LeavesQty</i>	42	4	Binary	New quantity available for execution
<i>WorkingPrice</i>	46	8	Binary	New working price

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>Symbol</i>	54	6	Alphanumeric	Cboe native identifier
<i>Side</i>	60	1	Alphanumeric	1 = Buy 2 = Sell
<i>RestatementReason</i>	61	1	Alphanumeric	The reason for this Order Restated message. K = Price sliding reprice (BZX only) Q = Liquidity W = Wash Cboe reserves the right to add new values as necessary without prior notice.

Example Quote Restated Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	3C 00	60 bytes
<i>MessageType</i>	52	Quote Restated
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000

<i>Symbol</i>	30 30 34 63 53 73	004cSs
<i>Side</i>	31	1 = Buy
<i>MassCancel</i>	57	W = Wash

4.2.11 User Modify Rejected

User Modify Rejected messages are sent in response to a Modify Order for an order which cannot be modified. User Modify Rejected messages are unsequenced.

This message corresponds to a FIX Execution Report with *MsgType* (35) = 9 (Order Cancel Reject) and *CxlRejResponseTo* (434) = 2 (Order Cancel/Replace Request).

Permitted return optional fields are described in 'Section 6.8 – User Modify Rejected'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x29
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	The <i>ClOrdID</i> of the modify request which was rejected.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>ModifyRejectReason</i>	38	1	Text	Reason for a modify rejection. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	39	60	Text	Human readable text with more information about the reject reason.
<i>ReservedInternal</i>	99	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	100	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	101	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example User Modify Rejected Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	63 00	99 bytes
<i>MessageType</i>	29	User Modify Rejected
<i>MatchingUnit</i>	00	Unsequenced Message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced Message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00	ABC123
<i>ModifyRejectReason</i>	50	Pending Fill
<i>Text</i>	50 65 6E 64 69 6E 67 00	Pending
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturnBitfields</i>	00	No optional fields

4.2.12 Order Cancelled

An order has been cancelled. Permitted return optional fields are described in 'Section 6.9 – Order Cancelled'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x2A
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	The order which was cancelled.
<i>CancelReason</i>	38	1	Text	Reason for the order cancellation. See Order Reason Codes for a list of possible reasons.
<i>ReservedInternal</i>	39	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	40	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	41	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Order Cancelled Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	48 00	72 bytes
<i>MessageType</i>	2A	Order Cancelled
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>CancelReason</i>	55	U = User Requested
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturnBitfields</i>		
<i>Bitfields</i>	05	Five bitfields to follow
<i>ReturnBitfield1</i>	00	No fields from byte 1
<i>ReturnBitfield2</i>	00	No fields from byte 2
<i>ReturnBitfield3</i>	06	<i>ClearingFirm, ClearingAccount</i>
<i>ReturnBitfield4</i>	00	No fields from byte 4
<i>ReturnBitfield5</i>	01	<i>OrigClOrdID</i>
<i>ClearingFirm</i>	54 45 53 54	TEST
<i>ClearingAccount</i>	31 32 33 34	1234
<i>OrigClOrdID</i>	41 42 43 31 32 31 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC121

4.2.13 Quote Cancelled

Support for Quote Cancelled messages will be available based on following rollout schedule:

Target Date	Milestone
11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

A `Quote Cancelled` message will be sent to indicate an unsolicited cancellation of a quote entered with a `Quote Update` message. An unsolicited cancellation is used, for example, when a resting quote is cancelled due to MTP with an inbound order or quotes are being cancelled due to a risk trip.

This message may be expanded in length in the future with new fields added to the end. To maintain forward compatibility, be prepared to receive a message longer than the documented length and to gracefully ignore those extra fields.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x53
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>QuoteUpdateID</i>	18	16	Text	Echoed back from the most recent <code>Quote Update</code> request for this quote.
<i>OrderID</i>	34	8	Binary	Order ID assigned by the matching engine
<i>Symbol</i>	42	6	Alphanumeric	Cboe native identifier
<i>Side</i>	48	1	Alphanumeric	1 = Buy 2 = Sell
<i>CancelReason</i>	49	1	Text	Reason for the quote cancellation. See Order Reason Codes for a list of possible reasons.

Example Quote Cancelled Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	30 00	48 bytes
<i>MessageType</i>	53	<code>Quote Cancelled</code>
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>QuoteUpdateID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00	ABC123
<i>OrderID</i>	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
<i>Symbol</i>	30 30 36 69 70 41	006ipA
<i>Side</i>	32	2 = Sell
<i>CancelReason</i>	41	A = Admin

4.2.14 Cross Order Cancelled (C1 and EDGX Only)

A `New Order Cross` has been cancelled. Individual order allocations from the original `New Order Cross` and `New Order Cross Multileg` message will be echoed back in the repeating groups.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

In each repeating group, the *ClOrdID* and *OrderID* are always returned. Beyond that, the bits specified in the optional return bitfields parameter group control which fields are returned. Any fields that appear in the repeating groups will not appear in the optional fields that come after the repeating groups.

Permitted return optional fields are described in 'Section 6.10 – Cross Order Cancelled'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x46
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>CrossID</i>	18	20	Text	The cross order which was cancelled.
<i>CancelReason</i>	38	1	Text	Reason for the order cancellation. See Order Reason Codes for a list of possible reasons.
<i>ReservedInternal</i>	39	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	40	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	41	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>GroupCnt</i>		2	Binary	Number of order allocations represented by repeating groups included in this message.
<i>Repeating Groups Of...</i>				
<i>ClOrdID</i>		20	Text	Copied from original cross order.
<i>OrderID</i>		8	Binary	The order id of the cross order that was cancelled.
<i>Side (Optional)</i>		1	Alphanumeric	See List of Optional Fields .
<i>AllocQty (Optional)</i>		4	Binary	See List of Optional Fields .
<i>Capacity (Optional)</i>		1	Alpha	See List of Optional Fields .
<i>OpenClose (Optional)</i>		1	Alphanumeric	See List of Optional Fields .
<i>GiveUpFirmID (Optional)</i>		4	Alpha	See List of Optional Fields .
<i>Account (Optional)</i>		16	Text	See List of Optional Fields .
<i>CMTANumber (Optional)</i>		4	Binary	See List of Optional Fields .
<i>ClearingAccount</i>		4	Text	See List of Optional Fields .

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>(Optional)</i>				
<i>Optional fields. . .</i>				Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Example Cross Order Cancelled Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	8A 00	138 bytes
<i>MessageType</i>	46	Cross Order Cancelled
<i>MatchingUnit</i>	02	Matching Unit 2
<i>SequenceNumber</i>	01 00 00 00	Sequence number 1
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	4E 5A 31 56 37 42 4A 5F 41 63	NZ1V7BJ_AcceptBuy
	63 65 70 74 42 75 79 00 00 00	
<i>CancelReason</i>	55	U = User Requested
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn</i>		
<i>Bitfields</i>	02	Two bitfields to follow
<i>ReturnBitfield1</i>	00	No fields from byte 1
<i>ReturnBitfield2</i>	41	Symbol, Capacity
<i>GroupCnt</i>	03 00	Two repeating groups to follow
<i>ClOrdID</i>	4E 5A 31 56 37 47 4E 5F 61 67	NZ1V7GN_agency
	65 6E 63 79 00 00 00 00 00 00	
<i>OrderID</i>	02 C0 91 A2 94 AB 78 04	2G4GYK000002 (base 36)
<i>Capacity</i>	43	C = Customer
<i>ClOrdID</i>	4E 5A 31 56 37 4B 46 5F 63 6F	NZ1V7KF_contra1

<i>OrderID</i>	03 C0 91 A2 94 AB 78 04	2G4GYK000003 (base 36)
<i>Capacity</i>	46	F = Firm
<i>ClOrderID</i>	4E 5A 31 56 37 4E 48 5F 63 6F	NZ1V7NH_contra2
	6E 74 72 61 32 00 00 00 00 00	
<i>OrderID</i>	04 C0 91 A2 94 AB 78 04	2G4GYK000004 (base 36)
<i>Capacity</i>	46	F = Firm
<i>Symbol</i>	30 30 51 30 6B 41 00 00	00Q0kA

4.2.15 Cancel Rejected

A *Cancel Rejected* message is sent in response to a *Cancel Order* message to indicate that the cancellation cannot occur. *Cancel Rejected* messages are unsequenced.

Permitted return bitfields are described in 'Section 6.11 – Cancel Rejected'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x2B
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	The order whose cancel was rejected.
<i>CancelRejectReason</i>	38	1	Text	Reason for the order cancellation. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	39	60	Text	Human readable text with more information about the reject reason.
<i>ReservedInternal</i>	99	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	100	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	101	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Cancel Rejected Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	63 00	99 bytes
<i>MessageType</i>	2B	Cancel Rejected
<i>MatchingUnit</i>	00	Unsequenced Message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced Message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00 00 00 00 00	
<i>CancelRejectReason</i>	4A	J
<i>Text</i>	54 4F 4F 20 4C 41 54 45 00 00	TOO LATE
	00 00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00 00	
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturnBitfields</i>	00	No optional fields

4.2.16 Order Execution

An `Order Execution` is sent for each fill on an order.

Rather than returning a monetary value indicating the rebate or charge for an execution, the *FeeCode* is an indication of a fee classification corresponding to an item on the venue's fee schedule.

For executions involving complex orders (**EDGX or C2 only**), an `Order Execution` message will be generated for the complex order, with *MultilegReportingType* = 3, followed by `Order Execution` messages for each leg, with *MultilegReportingType* = 2. You must opt-in to receiving this optional field on `Order Execution` messages at login in order to receive this field.

The symbology used on executions for complex orders, including the legs, will **always** be Cboe symbology.

Permitted return bitfields are described in 'Section 6.12 – Order Execution'.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Field	Offset	Length	Data Type	Description								
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.								
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.								
MessageType	4	1	Binary	0x2C								
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.								
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.								
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).								
ClOrdID	18	20	Text	Order receiving the execution.								
ExecID	38	8	Binary	Corresponds to ExecID (17) in Cboe FIX. Execution ID. Unique across all matching units on a given day. Note: ExecIDs will be represented on ODROP and FIXDROP ports as nine character, base 36 ASCII. Leading zeros should be added if the converted base 36 value is shorter than nine characters. Example conversion: <table><tr><th>Decimal</th><th>Base 36</th></tr><tr><td>28294005440239</td><td>A1234B567</td></tr><tr><td>76335905726621</td><td>R248BC23H</td></tr><tr><td>728557228187</td><td>09AP05V2Z</td></tr></table>	Decimal	Base 36	28294005440239	A1234B567	76335905726621	R248BC23H	728557228187	09AP05V2Z

<i>FeeCode</i>	41 42	AB
<i>MarketingFeeCode</i>	58 59	XY

4.2.18 Trade Cancel or Correct

Used to relay a trade which has been cancelled (busted) or corrected (price or size change only). The *CorrectedPrice* and optional *CorrectedSize* fields will be set to 0 for cancelled trades and to the new trade price and/or size for corrected trades. Trade Cancel or Correct can be sent for same day as well as previous day trades.

Trade cancels or corrections to complex instruments will result in individual Trade Cancel or Correct messages being sent for each leg. No cancels or corrections will be sent for complex instruments.

Permitted return bitfields are described in 'Section 6.13 – Trade Cancel or Correct'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x2D
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	<i>ClOrdID</i> of the order whose fill is being cancelled or corrected.
<i>OrderID</i>	38	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. Order whose fill is being cancelled or corrected.
<i>ExecRefID</i>	46	8	Binary	Corresponds to <i>ExecRefID</i> (19) in Cboe FIX. Refers to the <i>ExecID</i> of the fill being cancelled or corrected.
<i>Side</i>	54	1	Alphanumeric	Side of the order.
<i>BaseLiquidityIndicator</i>	55	1	Alphanumeric	Indicates whether the trade added or removed liquidity. A = Added Liquidity R = Removed Liquidity X = Routed to Another Market C = Auction/Uncrossing
<i>ClearingFirm</i>	56	4	Alpha	Echoed back from the original order.
<i>ClearingAccount</i>	60	4	Text	Echoed back from the original order.
<i>LastShares</i>	64	4	Binary	Number of shares of the trade being cancelled.
<i>LastPx</i>	68	8	Binary Price	Price of the trade being cancelled. Note the use of <i>Binary Price</i> type to represent positive and negative prices, which can occur with complex instruments.
<i>CorrectedPrice</i>	76	8	Binary Price	For trade corrections, this is the new trade price. For trade breaks, this is set to 0.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>OrigTime</i>	84	8	DateTime	Corresponds to <i>OrigTime</i> (42). The date and time of the original trade, in GMT.
<i>ReservedInternal</i>	92	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	93	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	94	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Trade Cancel or Correct Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	76 00	118 bytes
<i>MessageType</i>	2D	Trade Cancel or Correct
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123

<i>Side</i>	31	Buy
<i>BaseLiquidity Indicator</i>	41	A = Added
<i>ClearingFirm</i>	54 45 53 54	TEST
<i>ClearingAccount</i>	00 00 00 00	(empty)
<i>LastShares</i>	64 00 00 00	100 contracts
<i>LastPx</i>	70 17 00 00 00 00 00 00	0.60
<i>CorrectedPrice</i>	00 00 00 00 00 00 00 00	0 (cancelled)
<i>OrigTime</i>	E0 BA 75 95 15 4C EB 11	1,291,209,373,757,324,000
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn Bitfields</i>	04	Four bitfields to follow
<i>ReturnBitfield1</i>	00	No fields from byte 1
<i>ReturnBitfield2</i>	01	<i>Symbol</i>
<i>ReturnBitfield3</i>	00	No fields from byte 3
<i>ReturnBitfield4</i>	17	<i>MaturityDate, StrikePrice, PutOrCall, OpenClose</i>
<i>Symbol</i>	30 30 51 30 6B 41 00 00	00Q0kA
<i>MaturityDate</i>	EF DB 32 01	2011-03-19
<i>StrikePrice</i>	98 AB 02 00 00 00 00 00	17.50
<i>PutOrCall</i>	31	1 = Call
<i>OpenClose</i>	4F	O = Open

4.2.19 Purge Rejected

A *Purge Rejected* message is sent in response to a *Purge Orders* message to indicate that the mass cancellation cannot occur. *Purge Rejected* messages are unsequenced.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x48
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>PurgeRejectReason</i>	18	1	Text	Reason for a purge rejection. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	19	60	Text	Human readable text with more information about the reject reason.
<i>ReservedInternal</i>	79	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	80	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield₁</i>	81	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfield_n</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Purge Rejected Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	72 00	114 bytes
<i>MessageType</i>	48	Purge Rejected
<i>MatchingUnit</i>	00	Unsequenced Message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced Message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>PurgeRejectReason</i>	41	A
<i>Text</i>	41 44 4D 49 4E 00 00 00 00 00 00	ADMIN
	00 00 00 00 00 00 00 00 00 00 00

	00 00 00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00 00 00	
<i>ReservedInternal</i>	00	Ignore
<i>NumberOfReturn Bitfields</i>	0F	15 bitfields to follow
<i>ReturnBitfield1</i>	00	No fields from byte 1
<i>ReturnBitfield2</i>	00	No fields from byte 2
<i>ReturnBitfield3</i>	00	No fields from byte 3
<i>ReturnBitfield4</i>	00	No fields from byte 4
<i>ReturnBitfield5</i>	00	No fields from byte 5
<i>ReturnBitfield6</i>	00	No fields from byte 6
<i>ReturnBitfield7</i>	00	No fields from byte 7
<i>ReturnBitfield8</i>	00	No fields from byte 8
<i>ReturnBitfield9</i>	00	No fields from byte 9

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>ReturnBitfield10</i>	00	No fields from byte 10
<i>ReturnBitfield11</i>	00	No fields from byte 11
<i>ReturnBitfield12</i>	00	No fields from byte 12
<i>ReturnBitfield13</i>	00	No fields from byte 13
<i>ReturnBitfield14</i>	00	No fields from byte 14
<i>ReturnBitfield15</i>	08	<i>MassCancelID</i>
<i>MassCancelID</i>	54 45 53 54 00 00 00 00 00 00	TEST
	00 00 00 00 00 00 00 00 00 00	

4.2.20 Reset Risk Acknowledgment

Support for Reset Risk Acknowledgment messages will be available based on following rollout schedule:

Target Date	Milestone
11/09/18	Available in BZX, C2 and EDGX Options Certification Environments
01/17/19	Available in EDGX Options Production Environment
01/25/19	Available in BZX and C2 Options Production Environments
03/29/19	BOE Bulk message type will be deprecated in BZX, C2 and EDGX Options Production and Certification Environments

Response to a Reset Risk request.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x57
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>RiskStatusID</i>	10	16	Text	Unique identifier for this Reset Risk request. Response message will have this corresponding identifier.
<i>RiskResetResult</i>	26	1	Text	Y = Success F = Rejected; exceeds firm reset limit C = Rejected; exceeds Custom Group ID limit D = Rejected; automatic risk resets are disabled E = Rejected; empty <i>ResetRisk</i> field I = Rejected; Incorrect data center S = Rejected; exceeds risk root reset limit U = Rejected; invalid <i>RiskRoot</i> c = Rejected; invalid <i>EFID/ClearingFirm</i> y = Rejected; in replay Additional reject values may be added in the future with no notice.

Example Risk Reset Acknowledgment Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	19 00	25 bytes
<i>MessageType</i>	57	Risk Reset Acknowledgment

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>MatchingUnit</i>	00	Unsequenced Message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced Message, sequence = 0
<i>RiskStatusID</i>	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00	
<i>RiskResetResult</i>	00	Y = Success

4.2.21 Mass Cancel Acknowledgment

A *Mass Cancel Acknowledgment* is an unsequenced message sent when a *Cancel Order* or *Purge Orders* message requesting a mass cancellation has completed cancelling all individual orders.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x36
<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application. Message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time in the order entry gateway when the final matching engine event was received to complete the mass cancel.
<i>MassCancelID</i>	18	20	Text	Copied from the <i>MassCancelID</i> passed on the original <i>Cancel Order</i> or <i>Purge Orders</i> . This field corresponds to <i>MassCancelID</i> (7695) in Cboe FIX.
<i>CancelledOrderCount</i>	38	4	Binary	Number of orders cancelled. This field corresponds to <i>CancelledOrderCount</i> (7696) in Cboe FIX.
<i>ReservedInternal</i>	42	1	Binary	Reserved for Cboe internal use.

Example Mass Cancel Acknowledgment Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA	Start of message bytes.
<i>MessageLength</i>	29 00	41 bytes
<i>MessageType</i>	36	Mass Cancel Acknowledgment
<i>MatchingUnit</i>	00	Unsequenced Message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced Message, sequence = 0
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>MassCancelID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>CancelledOrderCount</i>	63 00 00 00	99 orders were cancelled
<i>ReservedInternal</i>	00	Ignore

4.2.22 Complex Instrument Accepted (C1, C2, and EDGX Only)

The *Complex Instrument Accepted* is used to indicate acceptance of a complex strategy. The leg order sent back may differ from the originating request; *RevisedLegs* will indicate if the leg order has been altered from the original request.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Permitted return bitfields are described in 'Section 6.14 – Complex Instrument Accepted'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x4D
<i>MatchingUnit</i>	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
<i>SequenceNumber</i>	6	4	Binary	The sequence number for this message. Distinct per matching unit.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	Echoed back from the original request.
<i>Symbol</i>	38	8	Alphanumeric	The complex instrument id.
<i>RevisedLegs</i>	46	1	Alphanumeric	Indicates if the legs on the created complex strategy have been reordered from the original request. If the legs were reordered, the order of the Open-Close fields on a <i>New Complex Order</i> must be the order returned by the exchange, not the order from the original request. 1 = Legs were not reordered 2 = Legs were reordered
<i>NoOfSecurities</i>	47	4	Binary	Corresponds to <i>NoOfSecurities</i> (8641) in Cboe FIX. Indicates the number of securities created by the member in the trading session.
<i>ReservedInternal</i>	51	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturnBitfields</i>	52	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	53	1	Binary	Bitfield identifying fields to follow.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>NoLegs</i>		1	Binary	Echoed back from the original request.
Repeating Group <i>ComplexLeg</i> must occur the number of times specified in <i>NoLegs</i> . Each field occurs in each group, in order as shown below. Optional fields occur only if corresponding bits in bitfields are set.				
<i>LegSymbol</i>	8	Alphanumeric	Corresponds to <i>LegSymbol</i> (600) in Cboe FIX. Entire Cboe format symbol or OSI Root. Must send <i>LegCFIcode</i>, <i>LegMaturityDate</i>, and <i>LegStrikePrice</i> if using OSI format.	
<i>LegCFIcode</i>	6	Alphanumeric	Corresponds to <i>LegCFIcode</i> (608) in Cboe FIX. CFI Code for leg. Required if <i>LegSymbol</i> is in OSI format. OP = Options Put OC = Options Call E = Equity	

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>LegMaturityDate</i>	4	Date	Corresponds to <i>LegMaturityDate</i> (611) in Cboe FIX. Required if <i>LegSymbol</i> is in OSI format.	
<i>LegStrikePrice</i>	8	Binary Price	Corresponds to <i>LegStrikePrice</i> (612) in Cboe FIX. Option strike price. System maximum is 99,999,999. Must be non-negative. Required if <i>LegSymbol</i> is in OSI format.	
<i>LegRatioQty</i>	4	Binary	Corresponds to <i>LegRatioQty</i> (623) in Cboe FIX. Ratio of number of contracts in this leg per order quantity. Must be between 1 and 99,999.	
<i>LegSide</i>	1	Alphanumeric	Corresponds to <i>LegSide</i> (624) in Cboe FIX. 1 = Buy 2 = Sell	
.				
<i>Optional fields...</i>				Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Example Complex Instrument Accepted Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes.
<i>MessageLength</i>	7C 00	124 bytes
<i>MessageType</i>	4D	Complex Instrument Accepted
<i>MatchingUnit</i>	03	Matching Unit 3
<i>SequenceNumber</i>	64 00 00 00	Sequence number 100
<i>TransactionTime</i>	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
<i>ClOrdID</i>	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
<i>Symbol</i>	5A 4E 4B 38 46 43 00 00	ZNK8FC
<i>RevisedLegs</i>	30	Legs accepted as sent
<i>NoOfSecurities</i>	04 00 00 00	Four complex strategies created by sender
<i>NumberOfReturn Bitfields</i>	0D	13 bitfields to follow
<i>ReturnBitfield1</i>	00	No fields from byte 1
<i>ReturnBitfield2</i>	00	No fields from byte 2
<i>ReturnBitfield3</i>	00	No fields from byte 3
<i>ReturnBitfield4</i>	00	No fields from byte 4
<i>ReturnBitfield5</i>	00	No fields from byte 5
<i>ReturnBitfield6</i>	00	No fields from byte 6
<i>ReturnBitfield7</i>	00	No fields from byte 7
<i>ReturnBitfield8</i>	00	No fields from byte 8
<i>ReturnBitfield9</i>	00	No fields from byte 9
<i>ReturnBitfield10</i>	00	No fields from byte 10
<i>ReturnBitfield11</i>	00	No fields from byte 11
<i>ReturnBitfield12</i>	00	No fields from byte 12
<i>ReturnBitfield13</i>	06	<i>LegCFIcode</i> , <i>LegMaturityDate</i> , <i>LegStrikePrice</i>
<i>NoLegs</i>	02	Two legs

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>LegSymbol</i>	4D 53 46 54 00 00 00 00	MSFT

<i>NoOfSecurities</i>	04 00 00 00	Four complex strategies created by sender
<i>NumberOfReturn</i>	00	No bitfields follow
<i>Bitfields</i>		
<i>NoLegs</i>	02	Two legs
<i>LegSymbol</i>	30 30 51 30 6B 41 00 00	00Q0kA
<i>LegRatioQty</i>	02 00 00 00	Ratio of 2
<i>LegSide</i>	31	Buy
<i>LegSymbol</i>	30 30 51 33 6B 43 00 00	00Q3kC
<i>LegRatioQty</i>	01 00 00 00	Ratio of 1
<i>LegSide</i>	32	Sell

4.2.23 Complex Instrument Rejected (C1, C2, and EDGX Only)

The Complex Instrument Rejected message is used to indicate that a requested complex strategy has been rejected. Complex Instrument Rejected messages are unsequenced.

Permitted return bitfields are described in 'Section 6.15 – Complex Instrument Rejected'.

Field	Offset	Length	Data Type	Description
<i>StartOfMessage</i>	0	2	Binary	Must be 0xBA 0xBA.
<i>MessageLength</i>	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
<i>MessageType</i>	4	1	Binary	0x4E

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>MatchingUnit</i>	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
<i>SequenceNumber</i>	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
<i>TransactionTime</i>	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
<i>ClOrdID</i>	18	20	Text	Echoed back from the original request.
<i>OrderRejectReason</i>	38	1	Text	Reason for an order rejection. See Order Reason Codes for a list of possible reasons.
<i>Text</i>	39	60	Text	Human readable text with more information about the reject reason.
<i>NoOfSecurities</i>	99	4	Binary	Indicates the number of securities created by the member in this trading session.
<i>ReservedInternal</i>	103	1	Binary	Reserved for Cboe internal use.
<i>NumberOfReturn Bitfields</i>	104	1	Binary	Number of bitfields to follow.
<i>ReturnBitfield¹</i>	105	1	Binary	Bitfield identifying fields to return.
...				
<i>ReturnBitfieldⁿ</i>		1	Binary	Last bitfield.
<i>Optional fields. . .</i>				

Example Complex Instrument Rejected Message:

Field Name	Hexadecimal	Notes
<i>StartOfMessage</i>	BA BA	Start of message bytes
<i>MessageLength</i>	67 00	103 bytes
<i>MessageType</i>	4E	Complex Instrument Rejected
<i>MatchingUnit</i>	0	Unsequenced message, unit = 0
<i>SequenceNumber</i>	00 00 00 00	Unsequenced message, sequence = 0

5 Input Bitfields Per Message

Legend:

- R** Indicates that the field must be specified for a message
- Indicates that the field can be specified for a message
- Indicates that the field cannot be requested for a message
- (Blank) Indicates that the field is not used by Cboe Options and cannot be specified for a message

Input messages that containing invalid fields (i.e., Blank) will be rejected. In the case of rejected input messages, the associated `Reject` message sent back to the customer will contain a 'RejectReason' code non-optional field (See **Order Reason Codes**) and a 'Text' non-optional field containing descriptive text.

	32	<i>(Reserved)</i>	
	64	<i>(Reserved)</i>	
	128	<i>(Reserved)</i>	

6 Return Bitfields Per Message

Legend:

- R** Indicates that the field must be specified for a message
- Indicates that the field can be specified for a message
- Indicates that the field cannot be requested for a message
- (Blank) Indicates that the field is not used by Cboe Options and cannot be specified for a message

Input messages that containing invalid fields (i.e., Blank) will be rejected. In the case of rejected input messages, the associated `Reject` message sent back to the customer will contain a 'RejectReason' code non-optional field (See **Order Reason Codes**) and a 'Text' non-optional field containing descriptive text.

7 List of Optional Fields

The following are descriptions of optional fields which may be sent or received.

Field	Length	Data Type	Description
<i>Account</i>	16	Text	<p>Corresponds to <i>Account</i> (1) in Cboe FIX.</p> <p>Reflected back on execution reports associated with this order and also passed through to the OCC in the Optional Data field (16 characters) and Customer ID field (max 10 characters). May be made available in the Member's clearing file. A maximum of 10 characters will be passed through to the OCC Customer ID Field but up to 16 characters will be maintain internally. Allowed characters are alphanumeric and colon.</p> <p><i>Account</i> (1) will only be mapped to the OCC via the Customer ID field (max 10 characters) and the new <i>ClearingOptionalData</i> (9324) field will be mapped to the OCC via the Optional Data field (16 characters).</p>
<i>AllocQty</i>	4	Binary	<p>Corresponds to <i>AllocQty</i> (80) in Cboe FIX.</p> <p>Number of contracts for this party.</p> <p>C1 and EDGX only.</p>
<i>AskOpenClose</i>	1	Alphanumeric	<p>Corresponds to <i>OpenClose</i> (77) in Cboe FIX.</p> <p>Offer side open/close. See <i>OpenClose</i> for allowed values.</p>
<i>AskOrderID</i>	8	Binary	<p>Corresponds to <i>OrderID</i> (37) in Cboe FIX.</p> <p>A kind of <i>BulkOrderID</i>. Order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.</p>
<i>AskOrderQty</i>	4	Binary	<p>Corresponds to <i>OrderQty</i> (38) in Cboe FIX.</p> <p>Number of contracts for the offer. System limit is 999,999 contracts.</p>
<i>AskRejectReason</i>	1	Text	<p>Reason for the individual order rejection.</p> <p>See Order Reason Codes for a list of possible reasons.</p>
<i>AskShortPrice</i>	4	Short Binary Price	<p>Corresponds to <i>Price</i> (44) in Cboe FIX.</p> <p>Offer limit price. Four implied decimal places. Must be non-negative.</p>
<i>AttributedQuote</i>	1	Alphanumeric	<p>Optional. Allows for an order to be attributed to a firm's Executing Broker ID in Cboe market data feeds. The order may also be included with attributed summary information displays related to quote/trade information on the Cboe website. Must opt-in to support through the Cboe Trade Desk.</p> <p>On a New Order Cross and New Order Cross Multileg this field is only applicable to the Agency order.</p> <p>All values will be available on BZX, C2, and EDGX with Feature Pack 4</p> <p>N = Do not attribute firm Executing Broker ID to this order (Default) Y = Attribute firm Executing Broker ID to this order X = Attribute <i>ClientID</i> only. (C1 only)</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

			Z = Attribute both <i>ClearingFirm</i> (EFID) and <i>ClientID</i> . (C1 only)
<i>AuctionId</i>	8	Binary	Corresponds to <i>AuctionId</i> (9370) in Cboe FIX. Auction order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products. C1, C2, and EDGX only.
<i>AutoMatch</i>	1	Alphanumeric	Corresponds to <i>AutoMatch</i> (9040) in Cboe FIX. Better-priced responses will be matched by the Contra side. Indicates the type of Auto Match the Contra Order will use. Mutually exclusive with <i>LastPriority</i> . Limit type Auto Match orders require <i>AutoMatchPrice</i> to be supplied. 0 = Disabled (Default) 1 = Market 2 = Limit C1 and EDGX only.
<i>AutoMatchPrice</i>	8	Binary Price	Corresponds to <i>AutoMatchPrice</i> (9044) in Cboe FIX. Sets the limit price at which the Contra Order will Auto Match. Required if <i>AutoMatch</i> = 2 (Limit). Ignored otherwise. Must be non-negative. 1 = Buy 2 = Sell C1 and EDGX only.
<i>AvgPx</i>	8	Binary Price	Corresponds to <i>AvgPx</i> (6) in Cboe FIX. Average price of executions for this order weighted by trade size. Zero if <i>CumQty</i> field is zero or if <i>MultilegReportingType</i> = 2.
<i>BaseLiquidityIndicator</i>	1	Alphanumeric	Indicates whether the trade added or removed liquidity. A = Added Liquidity R = Removed Liquidity X = Routed to Another Market C = Auction/Uncrossing
<i>BidOpenClose</i>	1	Alphanumeric	Corresponds to <i>OpenClose</i> (77) in Cboe FIX. Bid side open/close. See <i>OpenClose</i> for allowed values.
<i>BidOrderID</i>	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. A kind of <i>BulkOrderID</i> . Order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
<i>BidOrderQty</i>	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX. Number of contracts for the bid. System limit is 999,999 contracts.
<i>BidRejectReason</i>	1	Text	Reason for the individual order rejection. See Order Reason Codes for a list of possible reasons.
<i>BidShortPrice</i>	4	Short Binary Price	Corresponds to <i>Price</i> (44) in Cboe FIX. Bid limit price. Four implied decimal places. Must be non-negative.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>BulkOrderIDs</i>	8	Binary	If this return bit is requested, an order ID will be returned for each accepted new and cancelled order. See also <i>AskOrderID</i> or <i>BidOrderID</i> .
<i>BulkRejectReasons</i>	1	Alphanumeric	If this return bit is requested, a reject reason will be returned for each rejected order. See also <i>AskRejectReason</i> text for <i>BidRejectReason</i> text. See Order Reason Codes for a list of possible reasons.
<i>CancelOrigOnReject</i>	1	Alpha	Corresponds to <i>CancelOrigOnReject</i> (9619) in Cboe FIX. Indicates handling of original order on failure to modify. N = Leave original order alone Y = Cancel original order if modification fails
<i>Capacity</i>	1	Alpha	Corresponds to <i>OrderCapacity</i> (47) in Cboe FIX. The capacity of the order. C = Customer M = Market Maker F = Firm U = Professional Customer N = Non-Cboe Market Maker B = Broker-Dealer J = Joint Back Office L = Non-Trading Permit Holder Affiliate (C1 and C2 only)
<i>ClearingAccount</i>	4	Text	Corresponds to <i>OnBehalfOfSubID</i> (116) and <i>ClearingAccount</i> (440) in Cboe FIX. Supplemental identifier. Recorded and made available in execution reports. Available via Drop feeds. When <i>Capacity</i> is set to a value of M or N for Market Maker, this field should be filled with the desired market maker ID. When using CMTA, this value is the Market Maker ID for the CMTA member instead of the Cboe member executing the trade. This field will be sent to the OCC. If <i>Capacity</i> is set to something besides Market Maker, this field can be blank or filled out with an optional string that is passed through to the OCC.
<i>ClearingFirm</i>	4	Alpha	Corresponds to <i>OnBehalfOfCompID</i> (115) Cboe FIX. EFID that will clear the trade. Port attribute value of 'Default EFID' is used if not provided.
<i>ClearingOptionalData</i>	16	Text	Corresponds to <i>ClearingOptionalData</i> (9324) in Cboe FIX. This field will be reflected back on execution reports, FIX DROP ports and it will be passed through to the OCC in the Optional Data field.
<i>ClientIDAttr</i>	4	Text	Corresponds to <i>ClientID</i> (109) Cboe FIX. User defined identifier for quote attribution. C1 only. Effective in BZX, C2, and EDGX with Feature Pack 4
<i>CIOrdIDBatch</i>	20	Text	ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe. If the <i>CIOrdIDBatch</i> matches a live order, the order will be rejected as duplicate.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

			Note: Cboe only enforces uniqueness of <i>ClOrdIDBatch</i> values among currently live orders, which includes long-lived, persisting GTC/GTD orders . However, we strongly recommend that you keep your <i>ClOrdIDBatch</i> values unique.
<i>CMTANumber</i>	4	Binary	Corresponds to <i>CMTANumber</i> (439) in Cboe FIX. CMTA Number of the firm that will clear the trade. Must be specified for CMTA orders and left unspecified for non-CMTA orders.
<i>ComboOrder</i>	1	Alpha	Corresponds to <i>ComboOrder</i> (22005) in Cboe FIX. Declare the order as a Combo (for regulatory relief if trading SPX on the floor). N = (Default) No Y = Yes C1 only.
<i>Compression</i>	1	Alpha	Corresponds to <i>Compression</i> (22006) in Cboe FIX. Order is a compression trade. N = (Default) No Y = Yes C1 only.
<i>ContraCapacity</i>	1	Alphanumeric	Capacity of the contra for this execution. See <i>Capacity</i> for allowed values.
<i>ContraTrader</i>	4	Alphanumeric	Displays the EFID (<i>ClearingFirm</i>) of the contra side firm on all internally matched executions.
<i>CorrectedSize</i>	4	Binary	Corresponds to <i>CorrectedSize</i> (6655) in Cboe FIX. Number of shares after trade adjustment.
<i>CrossExclusion Indicator</i>	1	Alpha	Corresponds to <i>CrossExclusionIndicator</i> (6438) in Cboe FIX. N = Contracts were executed in auction against Contra party or against a resting order when auction was initiated Y = Contracts were executed in auction against another party. C1 and EDGX only.
<i>CrossId</i>	20	Text	Corresponds to <i>CrossID</i> (548) in Cboe FIX. Day-unique identifier for the cross order chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon and pipe. C1 and EDGX only.
<i>CrossType</i>	1	Alphanumeric	Corresponds to <i>CrossType</i> (549) in Cboe FIX. Type of auction order being submitted. This indicates the type of auction that will be initiated upon order entry. 1 = Bats Auction Mechanism ("BAM") (EDGX only), or Auction Internalization Mechanism ("AIM") (C1 only) 2 = Qualified Contingent Cross ("QCC") 3 = Solicitation Cross ("SAM") (C1 only)

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>CrossPrioritization</i>	1	Alphanumeric	<p>Corresponds to <i>CrossPrioritization</i> (550) in Cboe FIX.</p> <p>Indicates which side of the cross order will be prioritized for execution. This identifies the Agency side.</p> <p>1 = Buy 2 = Sell</p> <p>C1 and EDGX only.</p>
<i>CumQty</i>	4	Binary	<p>Corresponds to <i>CumQty</i> (14) in Cboe FIX</p> <p>Cumulative quantity of contracts executed for the order over the life of the order, which may be multiple business days in the case of persisting GTC/GTD orders.</p>
<i>CustomGroupID</i>	2	Binary	<p>Corresponds to <i>CustomGroupID</i> (7699) in Cboe FIX for <i>New Order</i> and <i>Purge Orders</i> messages.</p> <p>Used to group orders for use in <i>Purge Orders</i> where multiple orders can be cancelled by specifying a list of <i>CustomGroupIDs</i>.</p>
<i>DayAvgPx</i>	8	Binary Price	<p>Corresponds to <i>DayAvgPx</i> (426) in Cboe FIX.</p> <p>Applicable to persisting GTC/GTD orders only. Average price per contract of executions on current business date. Zero if <i>DayCumQty</i> is zero.</p>
<i>DayCumQty</i>	4	Binary	<p>Corresponds to <i>DayCumQty</i> (425) in Cboe FIX.</p> <p>Applicable to persisting GTC/GTD orders only. Cumulative quantity of contracts executed for the order during the current business day.</p>
<i>DayOrderQty</i>	4	Binary	<p>Corresponds to <i>DayOrderQty</i> (424) in Cboe FIX.</p> <p>Applicable to persisting GTC/GTD orders only. Contracts remaining to be filled for the order at the beginning of the current business day (i.e., <i>OrderQty</i> – <i>CumQty</i> at the end of the previous business day).</p>
<i>DisplayIndicator</i>	1	Alphanumeric	<p>Corresponds to <i>DisplayIndicator</i> (9479) in Cboe FIX.</p> <p>V = Default. As determined by port level setting (default to S)</p> <p>S = Display Price Sliding (this is to override a opt-out of Display Price Sliding at the port level (BZX only))</p> <p>L = Display Price Sliding, but reject if order crosses NBBO on entry (BZX only)</p> <p>M = Multiple Display Price Sliding (BZX only)</p> <p>P = Price Adjust</p> <p>m = Multiple Price Adjust</p> <p>R = Reject the order if it cannot be booked and displayed without adjustment.</p> <p>N = NoRescrapeAtLimit (BZX only)</p> <p>See 'Display Indicator Features' for more details on sliding options.</p>
<i>DisplayPrice</i>	8	Binary Price	<p>Only present when order is fully or partially booked. If the order has to be displayed at a less aggressive price for some reason, then that price will be reported here, otherwise equals <i>Price</i>.</p>
<i>DisplayRange</i>	4	Binary	<p>Corresponds to <i>DisplayRange</i> (8020) in Cboe FIX.</p> <p>Used for random replenishment of reserve orders. Random replenishment establishes a range of possible values for the</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

			<p>order quantity that is to be displayed. For example, if MaxFloor = 2,000, and DisplayRange = 200, the displayed quantity will be selected from one of the following values: 1,800, 1,900, 2,000, 2,100, or 2,200. Must be specified in round lots.</p> <p>Effective on C1 upon completion of migration to Bats technology.</p>
<i>DrillThruProtection</i>	8	Binary Price	<p>Corresponds to <i>DrillThruProtection</i> (6253) in Cboe FIX.</p> <p>Amount sender is willing to trade through the SNBBO. A zero price provides full SNBBO protection. The price should be entered as a non-negative value.</p> <p>Exchange default values are 3% of the opposite of the SNBBO, with a minimum value of \$0.02 and a maximum of \$0.10 for the default value. Values provided on a New Complex Order message do not have a minimum or maximum.</p> <p>C1, C2, and EDGX only.</p>
<i>EchoText</i>	64	Text	<p>Corresponds to <i>Text</i> (58) in Cboe FIX.</p> <p>Free format text string. May be echoed back on Cboe to Member messages.</p>
<i>EquityBuyClearingFirm</i>	4	Text	<p>Corresponds to <i>EquityBuyClearingFirm</i> (22014) in Cboe FIX.</p> <p>Clearing firm on buy side of the equity trade associated with a QCC trade.</p> <p>Valid when <i>CrossType</i> = '2'.</p> <p>C1 only.</p>
<i>EquityExDestination</i>	1	Alphanumeric	<p>Corresponds to <i>EquityExDestination</i> (22016) in Cboe FIX.</p> <p>Valid when an equity symbol is present in the complex instrument.</p> <p>Exchange venue to which equity leg matching will be submitted. Supported values are:</p> <p>C = Cowen (default)</p> <p>Additional targets planned after C1 migration. If buyer and seller do not match venues, then the equity match will be reported to Cowen ("C").</p> <p>C1 only.</p>
<i>EquityLegShortSell</i>	1	Alphanumeric	<p>Corresponds to <i>EquityLegShortSell</i> (22564) in Cboe FIX.</p> <p>5 = Sell Short (for stock leg)</p> <p>6 = Sell Short Exempt (for stock leg)</p> <p>C1 only.</p>
<i>EquityPartyId</i>	4	Alpha	<p>Corresponds to <i>EquityPartyId</i> (22008) in Cboe FIX.</p> <p>MPID used to clear the equity leg being cleared via the Exchange.</p> <p>C1 only.</p>
<i>EquitySellClearingFirm</i>	4	Text	<p>Corresponds to <i>EquitySellClearingFirm</i> (22015) in Cboe FIX.</p> <p>Clearing firm on sell side of the equity trade associated with a QCC trade.</p> <p>Valid when <i>CrossType</i> = '2'.</p> <p>C1 only.</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>EquityTradePrice</i>	8	Binary Price	Corresponds to <i>EquityTradePrice</i> (22011) in Cboe FIX. Price at which the equity associated with a QCC trade. Valid when <i>CrossType</i> = '2'. C1 only.
<i>EquityTradeSize</i>	4	Binary	Corresponds to <i>EquityTradeSize</i> (22012) in Cboe FIX. Number of shares executed in the equity associated with a QCC trade. Valid when <i>CrossType</i> = '2'. C1 only.
<i>EquityTradeVenue</i>	1	Text	Corresponds to <i>EquityTradeVenue</i> (22013) in Cboe FIX. Exchange venue where equity associated with a QCC traded. Valid when <i>CrossType</i> (549) = '2'. A = NYSE American B = Nasdaq BX C = NYSE National I = Investors Exchange J = Cboe EDGA Exchange K = Cboe EDGX Exchange M = CHX N = NYSE P = NYSE Arca Q = Nasdaq X = Nasdaq PSX Y = Cboe BYX Exchange Z = Cboe BZX Exchange C1 only.
<i>EquityTransactTime</i>	8	DateTime	Corresponds to <i>EquityTransactTime</i> (22015) in Cboe FIX. Time of equity trade associated with a QCC trade. Valid when <i>CrossType</i> = '2'. C1 only.

<p><i>MassCancel</i></p> <p><i>Legacy method to be deprecated at date TBD</i></p>	1	Alphanumeric	<p>Corresponds to <i>MassCancel</i> (7693) in Cboe FIX.</p> <p>Indicates that a mass cancellation is being performed.</p> <p>1 or 3 = Cancel all orders that match <i>RiskRoot</i> or <i>CustomGroupID</i>, regardless of <i>ClearingFirm</i>.</p> <p>2 or 4 = Cancel all orders that match the given <i>RiskRoot</i> or <i>CustomGroupID</i> and <i>ClearingFirm</i>.</p> <p>Values 3 and 4 are similar to 1 and 2, respectively, but individual <i>Order Cancelled</i> messages will not be sent for each order cancelled. Instead, a <i>Mass Cancel Acknowledgement</i> message with <i>MassCancelID</i> and <i>CancelledOrderCount</i> will be sent once all cancels have been processed.</p> <p>For <i>Purge Orders</i> messages, the <i>Mass Cancel Acknowledgement</i> message may always be requested by sending a <i>MassCancelID</i> in the <i>Purge Order</i> message, regardless of the value of the <i>MassCancel</i> field.</p> <p><i>MassCancel</i> requests will not cancel initiating orders for BAM Auctions.</p>
<i>MassCancelID</i>	20	Text	<p>Corresponds to <i>MassCancelID</i> (7695) in Cboe FIX.</p> <p>Copied from the <i>MassCancelID</i> passed on the original <i>Cancel Order</i> or <i>Purge Order</i> message.</p>
<i>MassCancelInst</i>	16	Text	<p>Corresponds to <i>MassCancelInst</i> (7700) in Cboe FIX. Used for specification of <i>Purge Orders</i> functionality and optionally used for specification of <i>Mass Cancel</i> functionality associated with the <i>Cancel Order</i> message.</p> <p>At least one character must be provided (<i>Clearing Firm Filter</i>). Contiguous characters must be specified up to total length. Truncated/unspecified characters will default to values indicated (D) below.</p> <p>1st Character: Clearing Firm Filter</p> <p>A = No filtering by clearing firm relationship is performed.</p> <p>F = All orders that were sent under the clearing relationship specified in <i>ClearingFirm</i> optional field. If "F" specified and <i>ClearingFirm</i> not provided, the <i>Mass Cancel</i> or <i>Purge Orders</i> will be rejected.</p> <p>2nd Character: Acknowledgement Style</p> <p>M = (D) <i>Order Cancelled</i> messages are sent for each cancelled order. If "M" is set and the <i>MassCancelID</i> optional field is specified, the <i>MassCancelID</i> value is ignored.</p> <p>S = A single <i>Mass Cancel Acknowledgement</i> message is sent once all cancels have been processed. The <i>MassCancelID</i> optional field must be specified or the <i>Mass Cancel</i> or <i>Purge Orders</i> will be rejected.</p> <p>B = Both individual <i>Order Cancelled</i> and <i>Mass Cancel Acknowledgement</i> messages will be sent. Also requires <i>MassCancelID</i> optional field to be specified or the <i>Mass Cancel</i> or <i>Purge Orders</i> will be rejected.</p> <p>3rd Character: Lockout Instruction</p> <p>N = (D) No lockout</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

			<p>L = Lockout until corresponding <i>RiskReset</i> received. Lockout can be used only with Clearing Firm Filter set to "F", otherwise the Mass Cancel or Purge Orders will be rejected. Lockout will apply to all New Order and Modify Order messages for the <i>ClearingFirm</i> (and <i>ProductName</i> or <i>CustomGroupIDs</i>, if specified), regardless of other filtering in the Purge Orders or Cancel Order message.</p> <p>4th Character: Instrument Type Filter (C1, C2, and EDGX Only) B = (D) Cancel both single leg and complex orders S = Cancel single leg orders only C = Cancel complex orders only</p> <p>5th Character: GTC Order Filter C = (D) Cancel GTC and GTD orders P = Don't cancel (preserve) GTC and GTD orders</p> <p>If the <i>RiskRoot</i> optional field is specified, it must contain a valid symbol (e.g., "MSFT"), in which case only orders associated with the specified <i>RiskRoot</i> will be cancelled.</p> <p>A self-imposed lockout can be released using the <i>RiskReset</i> field of the New Order or New Complex Order message. If <i>RiskRoot</i> optional field is specified, a symbol level reset is required, otherwise a firm level reset is required to release a lockout. For more information, refer to the 'Cboe Risk Management Specification'.</p>
<i>MassCancelLockout</i>	1	Alphanumeric	<p>Corresponds to <i>MassCancelLockout</i> (7697) in Cboe FIX.</p> <p>0 = No Lockout 1 = Lockout</p> <p>Members may initiate a new self-imposed order lockout in conjunction with a mass cancel for all resting orders and inflight orders. The value of 1 is only applicable in conjunction with <i>MassCancel</i> values of 2 and 4; other usage results in a reject.</p>
<i>MaturityDate</i>	4	Date	<p>Corresponds to <i>MaturityMonth</i> (200) and <i>MaturityDay</i> (205) in Cboe FIX.</p>
<i>MaxFloor</i>	4	Binary	<p>Corresponds to <i>MaxFloor</i> (111) in Cboe FIX.</p> <p>Portion of <i>OrderQty</i> to display. The balance is reserve. 0 displays the entire quantity. The displayed quantity of each order at a price level is decremented first. When displayed quantity is fully decremented, it is reloaded up to <i>MaxFloor</i> from reserve.</p> <p>Default = 0</p> <p>Effective on C1 upon completion of migration to Bats technology.</p>
<i>MaxRemovePct</i>	1	Binary	<p>Corresponds to <i>MaxRemovePct</i> (9618) in Cboe FIX.</p> <p>For Post Only At Limit (RoutingInst = Q), what percentage of the order quantity which remains after price improvement may be removed at the limit.</p> <p>Must be 0 for non-Post Only At Limit orders.</p> <p>0 = Don't Remove any shares at limit price 100 = Remove any amount at limit price</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

			BZX only.
<i>MinQty</i>	4	Binary	Corresponds to <i>MinQty</i> (110) in Cboe FIX. Minimum fill quantity for IOC orders which only interact with liquidity on the target book. Ignored for other orders.
<i>MultiClassSprd</i>	1	Alpha	Corresponds to <i>MultiClassSprd</i> (22004) in Cboe FIX. Indicates an option is part of a multi-class spread. N = (Default) No Y = Yes C1 only.
<i>MultilegReportingType</i>	1	Alphanumeric	Corresponds to <i>MultilegReportingType</i> (442) in Cboe FIX Indicates the type of <i>Order Execution</i> message. 1 = Single-leg instrument 2 = Individual leg of multi-leg instrument 3 = Entire multi-leg instrument package C1, EDGX and C2 only.
<i>NoOfSecurities</i>	4	Binary	Corresponds to <i>NoOfSecurities</i> (8641) in Cboe FIX. Indicates the number of securities created by the member in this trading session. C1, C2, and EDGX only.
<i>OpenClose</i>	1	Alphanumeric	Corresponds to <i>OpenClose</i> (77) in Cboe FIX. Indicates status of client position in the option. O = Open C = Close N = None* *Orders with a <i>Capacity</i> of M or N will not be required to specify <i>OpenClose</i> on their orders or may specify a value of N. A <blank> will be sent to the OCC. Contracts which are limited to closing only transactions with an <i>OpenClose</i> value of O will be rejected unless the <i>Capacity</i> field is M (Market Maker) and <i>TimeInForce</i> is 3 (Immediate or Cancel).
<i>OrderOrigin</i>	3	Alphanumeric	Corresponds to <i>OrderOrigin</i> (9465) in Cboe FIX. Floor acronym of Market Maker on whose behalf this order is being entered by a floor broker. C1 only.
<i>OrderQty</i>	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX. Order quantity. System limit is 999,999 contracts.
<i>OrdType</i>	1	Alphanumeric	Corresponds to <i>OrdType</i> (40) in Cboe FIX. 1 = Market 2 = Limit (default) 3 = Stop 4 = Stop Limit Market implies <i>TimeInForce</i> of IOC (3). Stop/Stop Limit orders must be set to <i>TimeInForce</i> = "0" (DAY), "1" (GTC), or "6" (GTD).
<i>OrigClOrdID</i>	20	Text	Corresponds to <i>OrigClOrdID</i> (41) in Cboe FIX.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>OrigCrossID</i>	20	Text	Corresponds to <i>OrigCrossID</i> (551) in Cboe FIX.
<i>ORS</i>	1	Alpha	<p>Corresponds to <i>ORS</i> (22003) in Cboe FIX.</p> <p>Order router subsidy eligibility (used for billing purposes).</p> <p>N = (Default) No Y = Yes</p> <p>C1 only.</p>
<i>PreventMatch</i>	3	Alpha	<p>Corresponds to <i>PreventMatch</i> (7928) in Cboe FIX.</p> <p>Three characters:</p> <p>1st character - MTP Modifier: N = Cancel Newest O = Cancel Oldest B = Cancel Both S = Cancel Smallest D = Decrement larger / Cancel Smaller d = Same as D above, but only decrement <i>LeavesQty</i>. Do not restate <i>OrderQty</i>.</p> <p>2nd character - Unique ID Level: F = Prevent Match at Firm(Member) Level M = Prevent Match at EFID Level</p> <p>3rd character - Trading Group ID (optional): Member specified alphanumeric value 0-9, A-Z, or a-z.</p> <p>The Unique ID level (character 2) of both orders must match to prevent a trade. If specified <u>on both orders</u>, Trading Group ID (character 3) must match to prevent a trade.</p> <p>The MTP Modifier (character 1) of the inbound order will be honored, except that if the inbound order specifies Decrement and the resting order does not, and the resting order is larger, then both orders will be cancelled. This exception is to protect the order entry software for the resting order from receiving an unexpected restatement message.</p> <p>If order entry software is prepared to handle unexpected restatement messages, this exception may be override at the port level by requesting "Allow MTP Decrement Override" functionality.</p> <p>Uses of MTP Modifier D or d and users of "Allow MTP Decrement Override" functionality must be prepared to receive an <i>Order Restated</i> message that decrements <i>LeavesQty</i> (and, for method D, <i>OrdQty</i> as well).</p> <p>On a <i>New Order Cross</i>, only N and O are supported for the MTP modifier. MTP instructions on BAM orders will be used to prevent executions against BAM responses only; they will permit executions against resting or unrelated orders. Responses may only employ N (Cancel Newest) in which case the response will be cancelled and the auction order will continue.</p> <p>On a <i>New Order Cross</i>, this field is only applicable to the Agency order.</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>Price</i>	8	Binary Price	<p>Corresponds to <i>Price</i> (44) in Cboe FIX.</p> <p>Limit price.</p> <p>Required for limit orders (<i>OrdType</i> = 2). If specified on market order (<i>OrdType</i> = 1), the order will be rejected.</p> <p>This field is also used to specify an optional cap price for pegged orders.</p> <p>For complex orders, net pricing of the strategy. Four implied decimal places. (EDGX and C2 only)</p> <p><i>Buy orders:</i></p> <ul style="list-style-type: none"> • Positive value, Debit • Negative value, Credit • Even order, 0 (Zero) <p><i>Sell orders:</i></p> <ul style="list-style-type: none"> • Positive value, Credit • Negative value, Debit • Even order, 0 (Zero)
<i>PriceType</i>	1	Alphanumeric	<p>Corresponds to <i>PriceType</i> (423) in Cboe FIX.</p> <p>0 = Fixed cabinet trade price 2 = (Default) Price per unit (contract) 3 = Fixed amount (cash spread pricing) – only for complex orders routed to the floor</p> <p>C1 only.</p>
<i>PutOrCall</i>	1	Alphanumeric	<p>Corresponds to <i>PutOrCall</i> (201) in Cboe FIX.</p> <p>0 = Put 1 = Call</p>
<i>RevisedLegs</i>	1	Alphanumeric	<p>Indicates if the legs on the created complex strategy have been reordered from the original request.</p> <p>If the legs were reordered, the order of the <i>OpenClose</i> fields on a <i>New Complex Order</i> must be the order returned by the exchange, not the order from the original request.</p> <p>1 = Legs were not reordered 2 = Legs were reordered</p> <p>C1, C2, and EDGX only.</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>RiskReset</i>	8	Text	<p>Corresponds to <i>RiskReset</i> (7692) in Cboe FIX.</p> <p>For use by customers using Cboe's Risk Management tools to reset or release EFID Group, EFID, Risk Root or Custom Group ID level lockout conditions resulting from risk profile trips or self-imposed lockouts issued via <i>Cancel Order</i> or <i>Purge Orders</i> messages.</p> <p>Single Character Values:</p> <p>S = Risk Root level risk/lockout reset F = EFID level risk/lockout reset C = CustomGroupID lockout reset G = EFID Group level risk/lockout reset</p> <p>Values may be combined together to allow for resets of multiple risk trips or self-imposed lockouts in a single message. For example, "GS", "SC", "FC", and "SFC" are all acceptable values.</p> <p>When a resting or inbound order is executed and a Risk Root level risk profile limit is reached, resting orders on the associated Risk Root will be cancelled and inbound orders on the Risk Root will be rejected until this field is filled with the value S on a subsequent <i>New Order</i> or <i>New Complex Order</i> message corresponding to a symbol on the same Risk Root. All active Risk Root level rules in the risk profile are reset at this time. Individual rules cannot be reset on their own.</p> <p>If an EFID-level rule is tripped, this tag can be filled with the value "F" to reset all EFID-level rules. While this will reset EFID-level rules, it is possible that both EFID and Risk Root level rules are currently tripped. Setting this field to "F" will not clear Risk Root-level rules and the order may still be rejected. To clear both Risk Root and EFID-level rules, set this field to "SF" to reset all associated Risk Root and EFID-level lockouts.</p> <p>If orders have been locked out at the <i>CustomGroupID</i> level, inbound orders for the locked <i>CustomGroupID</i> will be rejected until this field is filled with the value C on a <i>New Order</i> or <i>New Complex</i> order that uses the locked <i>CustomGroupID</i>.</p> <p>EFID and EFID Group resets are not allowed by default. Customers should contact the Cboe Trade Desk to reset these limits or request a change to the "EFID Risk Reset" port setting using the Logical Port Request form.</p> <p>For more information, refer to the 'Cboe US Options Risk Management Specification'.</p>
<i>RiskRoot</i>	6	Text	<p>Corresponds to <i>Symbol</i> (55) in Cboe FIX.</p> <p>The underlying symbol.</p>
<i>RouteDeliveryMethod</i>	3	Text	<p>Corresponds to <i>RouteDeliveryMethod</i> (9350) in Cboe FIX.</p> <p>RTI = Route to improve (default if not specified). Ability to receive price improvement will take priority over speed of execution.</p> <p>RTF = Route to Fill. Speed of execution will take priority over potential price improvement.</p> <p>Only applicable to <i>RouteStrategy</i> = ROUT</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>RoutingFirmID</i>	4	Alpha	<p>Corresponds to <i>RoutingFirmID</i> (7933) in Cboe FIX.</p> <p>Used to optionally convey the routing firm of the order. If supplied, value must be a valid member EFID.</p> <p>May be combined with <i>MassCancel</i> values 2 or 4, or <i>MassCancelInst</i> with Firm Filter set to "F" in a mass cancel request.</p> <p>C1, C2, and EDGX only.</p>
<i>RoutingInst</i>	4	Text	<p>Corresponds to <i>RoutingInst</i> (9303) in Cboe FIX.</p> <p>1st character:</p> <p>B = Book Only (not routable, will remove from local book)</p> <p>P = Post Only (not routable)¹</p> <p>Q = Post Only at Limit (removes liquidity that improves upon limit price and up to <i>MaxRemovePct</i> of remaining <i>OrdQty</i> at limit price) (BZX only)</p> <p>R = Routable</p> <p>S = Super Aggressive – Cross or Lock (order will be removed from the book and routed to any quote that is locking or crossing the order)</p> <p>X = Aggressive – Cross Only (order will be removed from the book and routed to any quote that is crossing the order)</p> <p>2nd character (C1 and EDGX only):</p> <p>L = Do Not Expose order via Step-Up Mechanism (SUM)</p> <p>S = Expose order via Step Up Mechanism (SUM)²</p> <p>For Bulk Orders, only P is permitted with the exception of auction responses, which do not require Post Only (EDGX and C2 only).</p>
<i>RoutingInst</i> (Complex)	4	Text	<p>Corresponds to <i>RoutingInst</i> (9303) in Cboe FIX.</p> <p>1st character:</p> <p>B = Book Only (will remove from local book), allowed to interact with both single-leg and other complex orders.</p> <p>D = Complex Book Only, allowed to interact with other complex orders only³.</p> <p>P = Post Only (adds liquidity only) (Effective in EDGX and C2 TBD)</p> <p>2nd character:</p> <p>L = Do Not Expose order via Complex Options Auction (COA)</p> <p>S = Expose order via Complex Options Auction (COA)⁴</p> <p>C1, C2, and EDGX only.</p>

¹ Post Only orders on EDGX with DisplayIndicator (Fix Tag 9479) = R will be cancelled back even if they would be immediately executable with price improvement.

² Routable Orders identified with *RoutingInst* = R, RS, S, SS, X or XS, and *RoutStrategy* = ROUT, and *AuctionId* not supplied, or Non-Routable Orders identified with *RoutingInst* = BS and *ExecInst* not f and *TimeInForce* not 4 and *MinQty* not supplied will participate in the Step-Up Mechanism (SUM) before routing, booking, or cancelling back.

³ Only valid with *TimeInForce* values of 0 (Day) or 3 (IOC), otherwise order will be rejected.

⁴ All non-IOC Complex Orders will be eligible for Complex Options Auction (COA) unless otherwise specified.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>RoutStrategy</i>	6	Text	Corresponds to <i>RoutStrategy</i> (9400) in Cboe FIX. All exchanges: ROUT = Book + Street DIRC ⁵ = Book + Directed IOC or Directed ISO if ExecInst = f SWPA = (default) Book + Sweep Street
<i>SecondaryExecID</i>	8	Binary	Field indicates whether a fill or partial fill is a complex instrument fill or a single leg fill that comprises a complex execution. <ul style="list-style-type: none"> • If SecondaryExecID (527) is not present, the fill is a single leg fill only. • If SecondaryExecID (527) is present and is the same as the ExecID (17) the fill represents a complex execution for which associated single leg fills will follow. • Single leg fills associated with a complex execution will contain a SecondaryExecID (527) of the associated complex execution. C1, C2, and EDGX only.
<i>SecondaryOrderID</i>	8	Binary	Corresponds to <i>SecondaryOrderID</i> (198) in Cboe FIX. Denotes an alternative <i>OrderID</i> which is present on Cboe market data feeds (for example, to hide that a reserve (iceberg) order has reloaded). Or, <i>OrderID</i> of the contra side of a prevented match.
<i>SenderLocationID</i>	1	Alphanumeric	Corresponds to <i>SenderLocationID</i> (142) in Cboe FIX. F = Floor <blank> = (or not present) for electronic execution.
<i>Side</i>	1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX. 1 = Buy 2 = Sell
<i>StopPx</i>	8	Binary Price	Corresponds to <i>StopPx</i> (99) in Cboe FIX. Stop price. Required if <i>OrdType</i> = 3 (Stop) or 4 (Stop Limit). Stop and Stop Limit orders will only be triggered off Last Sale Eligible trades.
<i>StrategyID</i>	1	Alphanumeric	Corresponds to <i>StrategyID</i> (22002) in Cboe FIX. Used to declare when a strategy is used. C = Conversion R = Reversal M = Merger S = Short stock interest J = Jelly roll C1 only.
<i>StrikePrice</i>	8	Binary Price	Corresponds to <i>StrikePrice</i> (202) in Cboe FIX. Strike Price for option, 0 – 999,999.99

⁵ Field *ExDestination* must be populated with *RoutStrategy* = DIRC. Must be specified when sending non-book only ISO, otherwise the order will be rejected.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

<i>SubLiquidityIndicator</i>	1	Alphanumeric	<p>Additional information about an execution. Cboe may add additional values without notice. Members must gracefully ignore unknown values.</p> <p>ASCII NUL (0x00) = No Additional Information S = Execution from order that set the NBBO B = Step Up Mechanism b = BAM/AIM (C1 and EDGX Only) C = Carried D = Done For Day q = QCC (C1 and EDGX Only) s = SAM (C1 Only)</p>
<i>Symbol</i>	8	Alphanumeric	<p>Corresponds to <i>Symbol</i> (55) in Cboe FIX.</p> <p>Entire Cboe format symbol</p>
<i>TargetPartyID</i>	4	Alpha	<p>Corresponds to <i>TargetPartyID</i> (1462) in Cboe FIX.</p> <p>A valid Parent ID of the Directed Market Maker (EDGX only) or Preferred Market Maker (C1 only). Required for directed orders.</p> <p>On a New Order Cross, this field is only applicable to the Agency order.</p> <p>C1 and EDGX only.</p>
<i>TimeInForce</i>	1	Alphanumeric	<p>Corresponds to <i>TimeInForce</i> (59) in Cboe FIX.</p> <p>0 = Day - (Default) Expires at end of market day. 1 = GTC* - Remains in system until executed, cancelled or option expires. 2 = At the Open - Will remain queued and only interact in the 'Cboe Opening Process' (BZX, C2, and EDGX only) or the Cboe Opening Auction (C1 only). 3 = IOC - Portion not filled immediately is cancelled. Market orders are implicitly IOC. 4 = FOK - An IOC where the entire size must be filled, else the order will be cancelled back. Not compatible with Step-Up Mechanism (SUM). 6 = GTD* - Expires at specified <i>ExpireTime</i> for a specified day.</p> <p>*Bulk/Quoting Ports will only support <i>TimeInForce</i> values of Day or GTD with a same day expiration.</p>
<i>SessionEligibility</i>	1	Alpha	<p>Corresponds to <i>TradingSessionID</i> (336) in Cboe FIX.</p> <p>A = Order participates in both Global and Regular Trading Hours (C1 only) R = (default) Order participates in Regular Trading Hours</p>
<i>TradeThroughAlertType</i>	1	Alphanumeric	<p>Corresponds to <i>TradeThroughAlertType</i> (21098) in Cboe FIX.</p> <p>Indication of a type of trade through.</p> <p>1 = NBBO 2 = BBO (local best bid or offer) 3 = SBBO (market quote of complex derived by legs) 4 = Book trade through (trade through customer size) 5 = Due Dilligence trade through</p>

If price had to be adjusted to a less aggressive value for some reason, then the adjusted price will be reported here, otherwise equals price.</p>

8 Reason Codes

8.1 Order Reason Codes

The following is a list of all order related reason codes used by Cboe. These reason codes are used in a variety of contexts (order cancellations and order rejections). All reasons are not valid in all contexts. Cboe may add additional reason codes without notice. Members must gracefully ignore unknown values.

- A = Admin
- D = Duplicate identifier (e.g., COrdID)
- H = Halted
- I = Incorrect data center
- J = Too late to cancel
- K = Order rate threshold exceeded
- L = Order would lock or Cross NBBO
- M = Order size exceeded
- N = Ran out of liquidity to execute against
- O = *COrdID* doesn't match a known order
- P = Can't modify an order that is pending fill
- Q = Waiting for first trade
- R = Routing Unavailable
- T = Fill would trade through the NBBO
- U = User requested
- V = Would wash
- W = Add liquidity only order would remove
- X = Order expired
- Y = Symbol not supported
- Z = Unforeseen reason
- c = Only Close transactions accepted
- f = Risk management EFID or Custom Group ID level
- m = Market access risk limit exceeded
- o = Max open orders count exceeded
- r = Reserve reload
- s = Risk management risk root level
- w = Would remove on unslide
- x = Crossed market
- y = Order received by Cboe during replay
- + = Risk management EFID Group level

8.2 Quote Reason Codes

The following is a list of all quote reason codes used by Cboe. All reasons are not valid in all contexts. Cboe may add additional reason codes without notice. Members must gracefully ignore unknown values.

- C = Invalid EFID (*ClearingFirm*)
- D = Invalid *WashId*
- E = Invalid *SessionEligibility*
- F = Not enabled for quotes
- I = Incorrect data center
- L = Invalid *QuoteCnt*
- M = Symbols not on same matching engine
- P = Invalid *PostingInstruction*
- Q = Invalid *QuoteUpdateID*
- R = Risk root does not match across quotes
- S = Symbol not found
- W = Invalid *WashPreventType*
- a = Admin
- c = Invalid *Capacity*
- d = Close only
- f = Risk management EFID or Custom Group ID level
- m = Invalid *WashMethod*
- o = Invalid Open/Close
- p = Risk management risk root level
- r = Invalid remove
- s = Invalid *Side*
- u = Sybmol range unreachable
- y = Quote received by Cboe during replay

10 Port Attributes

The table below lists BOE port attributes that are configurable on the port or firm level. Changes to these attributes can be made by contacting the Cboe Trade Desk.

Attribute	Default	Description
Allowed Clearing Executing Firm ID(s) *	All EFIDS	Executing Firm ID(s) allowed for trading on the port.
Allow Bulk Updates ^	No	Allow support for Bulk Order and Bulk Order Acknowledgment messages.
Default Executing Firm ID	None	Default Executing Firm ID to use if none is sent on a New Order or New Complex Order.
Allow Test Symbols Only	Disabled	Allow or disallow orders in non-test symbols
Allow ISO *	Yes	Allow or disallow ISO orders.
Allow Directed ISO *	Yes	Allow or disallow ISO orders directed to other market centers.
Default Routing Instruction +	9303=RS 9350=RTI 9400=SWPA	Specifies a default value for routing. Fields can be overridden at the order level. The defaults are <i>RoutingInst</i> = RS, <i>RouteDeliveryMethod</i> = RTI, and <i>RouteStrategy</i> = SWPA.
Maximum Order Size *	25,000	Maximum order quantity
Maximum Order Dollar Value *	Unlimited	Maximum dollar value per order.
Default Price Sliding	BZX = S EDGX/C2 = P	Default price sliding behavior. See <i>DisplayIndicator</i> for details.
Cancel on Disconnect	All	<p>Cancels open orders upon order handler session disconnect; both graceful and ungraceful. If Cancel On Disconnect is set, open orders in Symbols that are not in Closed state at the time of the disconnect are cancelled.</p> <p>All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled</p>
Cancel on ME Disconnect	All	<p>Controls whether orders are cancelled or preserved on a Matching Unit failover and provides for the ability to preserve GTC/GTD orders. In any event, if a failover takes longer than 5 minutes, all orders are cancelled (including GTC/GTD Orders).</p> <p>All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled</p>
Market Maker Reject if Cancel on Disconnect disabled	No	Rejection of Market Maker or Away-Market Maker orders if Cancel on Disconnect is not enabled. Non-Market Maker capacity order will be unaffected with this configuration.
Send Trade Breaks ^	No	Enables sending of Trade Cancel or Correct messages.
Default MTP Value *^+	None	Specifies default value for <i>PreventMatch</i> .
Allow MTP Decrement Override *^	No	Overrides the exception that requires both the resting and inbound order to be marked as "Decrement".
Allow Sponsored Participant MTP Control *^	No	Allow Sponsored Participant to override port default for match trade prevention by using <i>PreventMatch</i> on the order level.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Cancel on Reject ⁺	No	Cancels an order upon a cancel or modify reject.
Cancel on Regulatory Halt	All	Cancels open orders upon receipt of a Regulatory Halt. All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled
Fat Finger Protection *\$	BZX/EDGX = None C2 = See Web Portal Port Controls Specification for defaults	Orders entered through the NBBO by a specified percentage or dollar based limit price tolerance will be rejected. Limits may be different for different price ranges and price ranges may vary across markets. Please see the 'Web Portal Port Controls Specification' for complete details.
Reject Orders on DROP Port Disconnect *	No	If all associated Standard FIX DROP ports associated with an order entry session experience disconnection, new orders will be rejected until at least one Standard FIX DROP port session has been reestablished. Note this parameter does not apply to Order-By-Order drop ports (ODROP).
Reject Orders on DROP Port Timeout (seconds) *	30 seconds	Only applicable if "Reject Orders on DROP Port Disconnect" has been enabled. When the last Standard FIX DROP port associated with an order entry session has disconnected, begin rejecting orders on the order entry session if a Standard FIX DROP session has not been reestablished within this timeout. Minimum value allowed is 0 seconds.
Cancel Open Orders on DROP Port Disconnect *	None	Only applicable if "Reject Orders on DROP Port Disconnect" has been enabled. When the last Standard FIX DROP port associated with an order handler session has disconnected, open orders, associated with the session are cancelled. All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled Note this parameter applies to Standard FIX DROP ports and not Order-By-Order DROP ports (ODROP).
Carried Order Restatements	No	If the Carried Order Restatements port attribute is set, unsolicited Order Acknowledgement messages representing GTC/GTD orders loaded by the system at startup will be sent after the Login Response message and before any other messages for each product. Note that Carried Orders are restated to customers using the Order Acknowledgement messages with <i>BaseLiquidityIndicator=A</i> and <i>SubLiquidityIndicator=C</i> . Note that any changes made to any port attribute will not be enforced on carried GTC orders. Members who wish to apply updated port attributes to resting GTC orders must cancel those orders, and then resubmit them following the effective time of the port attribute change.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Done For Day Restatements	No	If the Done For Day Restatements port attribute is set, unsolicited <i>Order Acknowledgement</i> messages representing GTC/GTD orders that will be carried into the next session will be sent after the end of the trading session and before the system is recycled. Note that Done For Day Restatements are restated to customers using the <i>Order Acknowledgement</i> messages with <i>BaseLiquidityIndicator=A</i> and <i>SubLiquidityIndicator=D</i> .
Notional Cutoff Aggregation Methods *\$	None	Gross exposure = CBB + CBO + CEB + CEO Net exposure = (CEO + CBO) – (CEB + CBB) On a given port, Cboe will calculate and track four values: CBB = Cumulative Notional Booked Bid Value <i>The sum of limit price x size for all booked sell limit orders.</i> CBO = Cumulative Notional Booked Offer Value <i>The sum of limit price x size for all booked sell limit orders.</i> CEB = Cumulative Notional Executed Bid Value <i>The sum of size x trade price for all executed buy orders</i> CEO = Cumulative Notional Executed Sell Value <i>The sum of size x trade price on all executed sell orders</i>
Gross Daily Risk Limit Order Notional Cutoff *\$	None	Results in rejects for limit orders when gross exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Gross Daily Risk Market Order Notional Cutoff *\$	None	Results in rejects for market orders when gross exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Net Daily Risk Limit Order Notional Cutoff *\$	None	Results in rejects for limit orders when net exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Net Daily Risk Market Order Notional Cutoff *\$	None	Results in rejects for market orders when net exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Default Attributed Quote **	X	Default value for <i>AttributedQuote</i> . May override at order level. C† = Attribute <i>ClientIDAttr</i> only (C1 only) N = Don't Attribute (may override at order level) Y = Attribute EFID only Z† = Attribute EFID and <i>ClientIDAttr</i> (C1 only) X* = (Default) Never Attribute (may not be overridden at order level) † Effective on BZX, C2, and EDGX with Feature Pack 4 *On EDGX and BZX, this setting may only be changed after executing Attribution Addendum to Exchange User Agreement.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Crossed Market Cancel / Reject ^{\$}	No	Reject new orders when the NBBO in the security is crossed. Routable orders will have any remaining quantity cancelled back when the order returns to the book. Order modifications which cause a loss in priority will result in a cancel of the original order if the NBBO is crossed upon receipt of the modify request.
Duplicative Order Protection Time Threshold ^{\$}	None	Time window, in seconds, for Duplicative Order Protection Check
Duplicative Order Protection Order Count Threshold ^{\$}	None	Number of orders with the same <i>ClearingFirm</i> , <i>Price</i> , <i>OrdQty</i> , and <i>Symbol</i> that must be seen within the Duplicative Order Time Threshold to initiate Duplicative Order Protection Action.
Duplicative Order Protection Action ^{\$}	1	Action taken when Duplicative Order Protection criteria is met: 1 = Not enabled. 2 = Reject new orders for the remainder of Duplicative Order Time Threshold. 3 = Disable port for <i>ClearingFirm</i> . Must call Cboe Trade Desk to reenable.
EFID Risk Reset	Disabled	Configures how risk may be reset after a risk trip. Disabled = (Default). Will require manually resetting all EFID Group and EFID-Level Risk trips by contacting the Trade Desk. Enabled = Will allow EFID Group and EFID-level Risk resets using <i>RiskReset</i> of "F" or "G".
Post Order Rate Threshold	5,000 msgs/s	The maximum allowed message rate on the session. When the first non-session level message is received, a one second window begins. During the second no more than 4,999 additional non-session level messages will be allowed within that window. If the rate is exceeded, all new orders in the time window are rejected, modifies are treated as cancels, and cancels are processed. Maximum value is 5,000 msgs/sec. For Bulk/Quoting ports, the default threshold is unlimited.
Symbol Order Rate Threshold	5,000 msgs/s	Functions the same as the Port Order Rate Threshold, but is calculated at the symbol level. It is capped by the Port Order Rate Threshold. Maximum value is 5,000 msgs/sec. For Bulk/Quoting ports, the default threshold is unlimited.
Default <i>Account</i> Effective with Feature Pack 2	None	Default <i>Account</i> to be used if none is sent on inbound messages. Allows 16 characters or less (ASCII 33-126) but a max of 10 characters will be passed through to the OCC Customer ID Field.
Default <i>ClearingOptionalData</i> Effective with Feature Pack 2	None	Default <i>ClearingOptionalData</i> to be used if none is sent on inbound messages. Allows 16 characters or less (ASCII 33-126).
Default <i>FloorRoutingInst</i> (C1 only)	X	D = Direct. Do not attempt to process electronically E = Electronic only X = (Default) Route to floor if unable to process electronically.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

Default <i>FloorDestination</i> (C1 only)	None	Specifies a default PAR workstation (ex. W001) to route to on the floor (or “PARO” to route to the Floor PAR Official of the underlying symbol) if not specified on inbound messages. 4 characters or less (ASCII 33-126).
Default <i>EquityPartyID</i> C1 Only	None	Default <i>EquityPartyID</i> to be used if none is specified on inbound messages.
Default <i>ClientIDAttr</i> C1 Only Effective in BZX, C2, and EDGX with Feature Pack 4	None	Default <i>ClientIDAttr</i> to be used if none is specified on inbound messages.

* Sponsored Participants require written approval from Sponsors to update these settings on ports associated with a Sponsor’s MPID.

+ Port attribute can be overridden on an order-by-order basis.

^ Requires certification.

\$ Not supported for quotes.

Revision History

Date	Description
June 16, 2014	<i>Version 2.0.2</i> First public release of US Options BOE Version 2 specification.
July 1, 2014	<i>Version 2.0.3</i> Added Hours of Operations section. Corrected Cancel on Disconnect options.
July 3, 2014	<i>Version 2.0.4</i> Added field descriptions for <i>FeeCode</i> and <i>EchoText</i> .
July 7, 2014	<i>Version 2.0.5</i> Removed all return bits from <i>User Modify Rejected V2</i> messages. No optional return fields are allowed. Corrected a number of optional return bits. Added <i>RoutingInst</i> , <i>RoutStrategy</i> , <i>RouteDeliveryMethod</i> , and <i>ExDestination</i> as optional return bits (byte 8).
July 9, 2014	<i>Version 2.0.6</i> Corrected instances where <i>ContraCapacity</i> and <i>CorrectedSize</i> may be requested as optional return fields.
August 15, 2014	<i>Version 2.0.7</i> Added field descriptions for <i>RoutStrategy</i> , <i>ExDestination</i> , and <i>StopPx</i> .
August 22, 2014	<i>Version 2.0.8</i> Added Super Aggressive When Odd Lot <i>RoutingInst</i> value.
August 26, 2014	<i>Version 2.0.9</i> Added Reason Code of <i>w</i> (Would Remove on Unslide).
August 28, 2014	<i>Version 2.0.10</i> Corrected <i>Bulk Order V2</i> input bitelds.
September 3, 2014	<i>Version 2.0.11</i> Removed <i>SymbolSfx</i> from allowed fields for <i>New Order V2</i> . Removed <i>DiscretionAmount</i> and <i>PartyID</i> from allowed return bitfields for a number of messages. Corrected data type for <i>AcceptedCount</i> and <i>RejectedCount</i> to be Binary (not Text). Corrected data type for <i>BulkOrderRejectReasons</i> and <i>OrderRejectReason</i> to be Text (not Binary). Removed <i>AccessFee</i> from allowed return bitelds for <i>Order Restated V2</i> . Added clarification on <i>BulkOrderIDs</i> , <i>AskOrderID</i> , and <i>BidOrderID</i> . Added clarification on <i>BulkRejectReasons</i> , <i>AskRejectReason</i> and <i>BidRejectReason</i> .
September 8, 2014	<i>Version 2.0.12</i> Removed <i>ContraBroker</i> from List of Optional fields.
September 9, 2014	<i>Version 2.0.13</i> Removed <i>AccessFee</i> from <i>Order Execution V2</i> allowed return bitfields.
October 10, 2014	<i>Version 2.0.14</i> Claried ability to reuse <i>ClOrdId</i> with <i>Modify Orders</i> when daily limit trading risk controls are enabled.
November 13, 2014	<i>Version 2.0.15</i> Corrected <i>New Order V2</i> input bitelds to note that <i>DisplayIndicator</i> is permitted.

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

January 8, 2015	<p><i>Version 2.0.16</i></p> <p>Corrected <code>Order Execution V2</code> return bitfields to note that <i>SubLiquidityIndicator</i> is not allowed – it's already available in the message body.</p> <p>Minor correction of <i>PreventMatch</i> text (no functional change).</p>
February 19, 2015	<p><i>Version 2.0.17</i></p> <p>Added new <i>Capacity</i> values of N, B, and J, effective June 1, 2015.</p>
June 10, 2015	<p><i>Version 2.0.18</i></p> <p>Added Reason Code value of T.</p>
June 23, 2015	<p><i>Version 2.1.0</i></p> <p>Updated for EDGX Options.</p> <p>Added new fields <i>TargetPartyID</i> and <i>MarketingFeeCode</i>. Updated descriptions to note which fields are BZX Options or EDGX Options specific.</p>
June 23, 2015	<p><i>Version 2.1.1</i></p> <p>Added Duplicative Order Protection port attributes.</p>
October 26, 2015	<p><i>Version 2.1.2</i></p> <p>Added reason code of T.</p> <p>Updated <i>DisplayIndicator</i> description to note that, per EDGX Options Exchange rules, Display Price Sliding may not be combined with the Post Only instruction.</p>
October 27, 2015	<p><i>Version 2.1.3</i></p> <p>Added EDGX as possible <i>ContraBroker</i> value.</p>
October 31, 2015	<p><i>Version 2.1.4</i></p> <p>Corrected values for <i>MarketingFeeCode</i>.</p> <p>Changed text to note that <i>TargetPartyID</i> is simply copied back on all response messages.</p>
November 11, 2015	<p><i>Version 2.1.5</i></p> <p>Updated Pre-Market Queuing Session time to 7:30am, beginning December 11, 2015, pending SEC approval.</p>
December 24, 2015	<p><i>Version 2.1.6</i></p> <p>Updated description of <i>TargetPartyID</i> and <i>Capacity</i> for revised directed order functionality.</p> <p>Added Firm Risk Reset port attribute.</p> <p>Updated description of <i>ClearingFirm</i>.</p>
January 19, 2016	<p><i>Version 2.1.7</i></p> <p>Added Mercury as possible <i>ExDestination</i> and <i>ContraBroker</i> value.</p>
February 17, 2016	<p><i>Version 2.1.8</i></p> <p>Updated for new branding.</p>
February 25, 2016	<p><i>Version 2.1.9</i></p> <p>Added new <i>RestatementReason</i> value of P.</p>
March 23, 2016	<p><i>Version 2.1.10</i></p> <p>Updated description of <i>RoutStrategy</i> to state that routable ISOs must be sent using DIRC.</p> <p>Updated the minimum value of “Reject Orders on DROP Port Timeout” to be 0 seconds.</p>
May 16, 2016	<p><i>Version 2.1.11</i></p> <p>Added new field <i>AuctionID</i> and added S as a possible second character for <i>RoutingInst</i>, along with information about the Step-Up Mechanism (SUM).</p> <p><i>AuctionID</i> replaced <i>EffectiveTime</i> in <code>New Order V2</code> and all of the return bitfields.</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

June 10, 2016	<i>Version 2.1.12</i> Display Price Sliding support eliminated for EDGX Options effective July 11, 2016.
June 28, 2016	<i>Version 2.1.13</i> Added new <i>SubLiquidityIndicator</i> of B for Step Up Mechanism.
August 3, 2016	<i>Version 2.1.14</i> WAIT orders will be eliminated upon migration of BZX Options to its next generation matching engine. Refer to Release Notes on Bats' public web site for deployment schedule.
August 17, 2016	<i>Version 2.1.15</i> Corrected <i>ExDestination</i> value of EDGX Options to be G.
September 2, 2016	<i>Version 2.2.0</i> Add new message types and fields to support cross orders (EDGX Only). Includes <i>New Order Cross</i> , <i>Cross Order Acknowledgment</i> , <i>Cross Order Rejected</i> , <i>Cross Order Cancelled</i> , and supporting fields. Effective 11/11/2016.
October 4, 2016	<i>Version 2.2.1</i> Add <i>RoutingFirmID</i> as a valid field for single order messages.
November 11, 2016	<i>Version 2.2.2</i> Added new <i>SubLiquidityIndicator</i> of b for Bats Auction Mechanism. Updated Display Price Sliding to indicate it is BZX only . Added clarification that <i>ClearingAccount</i> is required when <i>Capacity</i> is M or N.
December 15, 2016	<i>Version 2.2.3</i> Removed <i>RoutingInst</i> value of C (Book Only WAIT order). Claried which <i>RoutingInst</i> values are allowed for <i>Bulk Orders</i> . Added port param for rejecting MM capacity orders if Cancel on Disconnect is disabled.
January 24, 2017	<i>Version 2.2.4</i> Added support for MIAX Pearl routing. Added 2 (Qualified Contingent Cross) as an acceptable <i>CrossType</i> for <i>New Order Cross</i> messages.
January 27, 2017	<i>Version 2.2.5</i> Added new message types and fields to support purge ports. Includes <i>Purge Orders V2</i> , <i>Purge Rejected V2</i> , and supporting fields. Modified <i>New Order V2</i> message input bitfields to include the optional <i>CustomGroupID</i> field. Effective Date March 1, 2017. Added <i>RoutingFirmID</i> to <i>Modify Order V2</i> and <i>Cancel Order V2</i> messages.
February 27, 2017	<i>Version 2.2.6</i> Correct <i>MassCancel</i> field description in <i>Purge Orders V2</i> message examples from lockout to single ack.
March 2, 2017	<i>Version 2.2.7</i> Add new field type <i>Date</i> .
March 22, 2017	<i>Version 2.2.8</i> Remove Suppress Cancels on Sessions Close port attribute.
March 22, 2017	<i>Version 2.2.9</i> Add descriptions of port attributes "Allow Test Symbols Only", "Port Order Rate Threshold", and "Symbol Order Rate Threshold".

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

May 11, 2017	<p><i>Version 2.3.0</i></p> <p>Add new message types and fields to support complex orders (EDGX Only). Includes New Complex Order, New Complex Instrument, Complex Instrument Accepted, Complex Instrument Rejected, and supporting fields. Effective 10/23/2017.</p>
June 13, 2017	<p><i>Version 2.3.1</i></p> <p>Removed support for <i>TimeInForce</i> value of 4 (Fill-or-Kill) on complex orders. Added clarification of valid <i>TimeInForce</i> values used with <i>RoutingInst</i> value of D on complex orders. Corrected options for port attribute "Cancel on Disconnect".</p>
July 7, 2017	<p><i>Version 2.3.2</i></p> <p>Corrected field type and size of <i>RevisedLegs</i>. Fixed naming inconsistency of <i>AttributedQuote</i> sometimes being called <i>AttributedOrder</i>. Claried symbology use on Order Execution V2 messages for complex orders.</p>
July 25, 2017	<p><i>Version 2.3.3</i></p> <p>Added <i>SecondaryExecId</i> to Order Execution V2. Added new Mass Cancel/Purge Request specication style using <i>MassCancelInst</i> field Effective 10/23/2017.</p>
July 28, 2017	<p><i>Version 2.3.4</i></p> <p>Updated description of use of <i>MassCancelInst</i> field in Purge Orders V2 message Effective 10/23/2017.</p>
August 3, 2017	<p><i>Version 2.3.5</i></p> <p>Added <i>RiskReset</i> and <i>CustomGroupId</i> to New Complex Order message.</p>
August 7, 2017	<p><i>Version 2.3.6</i></p> <p>Corrected size of <i>NoOfSecurities</i> field in message description and examples.</p>
August 9, 2017	<p><i>Version 2.3.7</i></p> <p>Added <i>ClearingFirm</i> optional field to New Complex Instrument message.</p>
August 14, 2017	<p><i>Version 2.3.8</i></p> <p>Corrected Purge Orders message biteld ordering and added <i>RoutingFirmID</i>.</p>
September 1, 2017	<p><i>Version 2.4.0</i></p> <p>Removed references to V2 as the V1 specification was deprecated. Added C2-specific references. Updated Cancel on Disconnect, Cancel on ME Disconnect, Cancel on DROP Port Disconnect and Cancel on Regulatory Halt to all provide GTC filtering.</p>
September 15, 2017	<p><i>Version 2.4.1</i></p> <p>Added support for Feature Pack 1. Available in Certification effective 9/15/17 and in Production effective 10/13/17.</p>
October 5, 2017	<p><i>Version 2.4.2</i></p> <p>Updated explanatory text for <i>MassCancelInst</i> lockout behavior. <i>TimeInForce</i> = 2 (At the open) is supported effective 10/23/17. Updated Feature Pack 1 effective date from 10/6/17 to 10/13/17. Removed introduction of <i>ContraTrader</i> and <i>ContraBroker</i> and deprication of <i>ContraCapacity</i> from Feature Pack 1 release. Removed <i>Side</i> and <i>OrderQty</i> from the New Complex Instrument example.</p>
October 17, 2017	<p><i>Version 2.4.3</i></p> <p>Updated <i>Symbol</i> in Complex Instrument Accepted message to indicate this is the complex instrument id. Cboe branding/logo changes.</p>

Cboe Options Exchanges
BOE Specification (Version 2.8.3)

November 7, 2017	<p><i>Version 2.4.4</i></p> <p>Updated to indicate that Bulk Order Acknowledgements are unsequenced. Corrected various spelling errors, field name and case inconsistencies. Updated Return Order Bitfields for Cross Order Acknowledgement, Cross Order Rejected and Cross Order Cancelled. Added Feature Pack 2 enhancements for <i>ContraTrader</i> and <i>ContraBroker</i> values effective on 12/8/17.</p>
December 6, 2017	<p><i>Version 2.4.5</i></p> <p>Corrected Cross Order Cancelled message type to 0x46. Updated effective date of Feature Pack 2 to 12/15/17.</p>
December 15, 2017	<p><i>Version 2.4.6</i></p> <p>Updated effective date of Feature Pack 2 to 01/05/18 Corrected length of <i>DrillThruProtection</i> field. It is eight bytes.</p>
December 27, 2017	<p><i>Version 2.4.7</i></p> <p>Added Done For Day Restatement functionality. Protocol feature section 1.6.2 added to describe the feature. Done For Day Restatements port attribute added to enable and disable feature, which defaults to disabled. Default for Carried Order Restatements changed from enabled to disabled. Updated <i>Modify Order</i> message to clarify when an order loses time priority.</p>
January 12, 2018	<p><i>Version 2.4.8</i></p> <p>Fixed incorrect <i>GroupCnt</i> and <i>MessageLength</i> in Bulk Order example. Added GTC/GTD persistence across trading sessions to BZX and EDGX (Effective in EDGX on 1/26/18 and BZX on 2/2/18).</p>
January 24, 2018	<p><i>Version 2.4.9</i></p> <p>Removed reference to EFID needing to be registered in the underlying and <i>Capacity</i> needing to be set to 'M' in order to send Bulk Orders for C2 in section 4.1.6. GTCs and GTDs that expire on a future date cannot be sent on Bulk Order Ports. Added 'L' reason code to the list of reason codes in Section 8.</p>
January 30, 2018	<p><i>Version 2.4.10</i></p> <p>Added Post Only restriction for Bulk Order message on EDGX Options effective 3/23/18.</p>
February 20, 2018	<p><i>Version 2.5.0</i></p> <p>Update GTC/GTD functionality to allow order cancelation after trading sessions ends.</p>
March 21, 2018	<p><i>Version 2.5.1</i></p> <p>Updated OSI Root to Underlying symbology for EDGX Options (effective 6/11/18) and BZX (effective 6/25/18) Options. Removed <i>AllocQty</i> as an available return bitfield on Trade Cancel or Correct message.</p>
